

New instrument for modern and reliable customs control equipment

The Council and the European Parliament today signed the regulation establishing the instrument for financial support for customs control equipment. The new instrument aims to ensure that customs authorities at the EU's external borders are properly equipped so that the customs union can function smoothly.

The customs control equipment instrument will support the purchase, maintenance and upgrade of the equipment needed for efficient and effective customs controls. It can be used to fund items such as x-ray scanners, radiation detectors, automated number plate recognition systems and mobile laboratories for analysis of goods samples.

The instrument is a part of the long-term EU budget for 2021-2027 and has a financial envelope of about €1 billion. The equipment purchased under this instrument will mainly be used for customs controls, although it may also be used occasionally for additional purposes, such as to support the national border management authorities in carrying out checks on persons.

Background

The customs union is essential for the proper functioning of the single market, as the goods that enter one member state can then move freely within the Union. The instrument will contribute to keeping citizens safe and secure without impeding legitimate trade with third countries.

Custom duties account for 13% of the total EU budget revenue. Modern and reliable control equipment at the external border will help the customs authorities to protect the financial and economic interests of the Union, ensure the safety and security of citizens, and protect the Union from unfair and illegal trade, such as counterfeiting of goods.

This regulation, together with the 'Customs' programme for cooperation in the field of customs, forms a solid basis for the continuous development of the customs union under the 2021-2027 multiannual financial framework. The 'Customs' programme, adopted in March, supports cooperation between customs authorities across the Union and allows the joint development and operation of pan-European IT systems.

The regulation will apply retroactively from 1 January 2021.

Europol helps Belgian and Swiss authorities unravel Vitae Ponzi scheme

With the support of Europol, the Belgian Federal Judicial Police (Federale Gerechtelijke Politie, Police Judiciaire Fédérale) under the jurisdiction of the Belgian Federal Prosecutor's Office (Federaal Parket, Parquet Fédéral) has taken action against the alleged members of an organised crime group running a worldwide Ponzi scheme.

This criminal syndicate was using the social media platform 'Vitae.co' and website 'Vitaetoken.io' to trick people into investing into a Ponzi scheme. It is believed that some 223 000 individuals from 177 countries have fallen victim to this investment scam.

On 22 June, house searches were carried out in 17 different locations in Belgium, mainly in Antwerp, West Flanders and Limburg. A total of five individuals were detained for their alleged involvement in this fraud scheme.

The members of this organised crime group are for the most part Belgian nationals who were making use of a company under Swiss jurisdiction. A number of house searches were carried out in parallel by the Swiss Federal Police (fedpol).

A total of €1,1 million in cash was seized, alongside €1,5 million worth in cryptocurrencies and 17 luxury vehicles.

Europol deployed four of its experts to Belgium and Switzerland to assist the national authorities with the actions in the field.

The website and social media platform have now been rendered inaccessible.

This operation was carried out in the framework of the European Multidisciplinary Platform Against Criminal Threats (EMPACT).

In 2010 the European Union set up a [four-year Policy Cycle](#) to ensure greater continuity in the fight against serious international and organised crime. In 2017 the Council of the EU decided to continue the EU Policy Cycle for the 2018 – 2021 period. It aims to tackle the most significant threats posed by

organised and serious international crime to the EU. This is achieved by improving and strengthening cooperation between the relevant services of EU Member States, institutions and agencies, as well as non-EU countries and organisations, including the private sector where relevant. Criminal finances is one of the priorities for the Policy Cycle.

[Survey: Help shape the future of ESCAIDE](#)

ECDC has appointed the independent consulting firm [BDO LLP](#) to deliver this evaluation, which will include a short survey on several aspects of ESCAIDE.

We would be interested to hear your opinion and would like to invite you to answer the survey questions via the following link:

<https://response.questback.com/bdo/ESCAIDEevaluation>

The survey should take 5-10 minutes to complete.

This is an anonymous survey and the results will be reported in summary form only – we therefore encourage you to be as frank and open as possible.

We invite your responses no later than **Friday 9 July 2021** at 23:59 Central European Time.

Thank you for your time and interest in shaping the future of ESCAIDE.

[EU imposes sanctions on Belarusian economy](#)

The Council today introduced **new restrictive measures against the Belarusian regime** to respond to the escalation of serious human rights violations in Belarus and the violent repression of civil society, democratic opposition and journalists, as well as to the forced landing of a Ryanair flight in Minsk on 23 May 2021 and the related detention of journalist Raman Pratasevich and Sofia Sapega.

The **new targeted economic sanctions** include the prohibition to directly or indirectly sell, supply, transfer or export to anyone in Belarus equipment, technology or software intended primarily for use in the monitoring or **interception of the internet and of telephone communications**, and **dual-use**

goods and technologies for military use and to specified persons, entities or bodies in Belarus. Trade in **petroleum products, potassium chloride** ('potash'), and goods used for the production or manufacturing of **tobacco products** is restricted. Furthermore, **access to EU capital markets** is restricted, and **providing insurance and re-insurance** to the Belarusian government and Belarusian public bodies and agencies is prohibited. Lastly, the **European Investment Bank** will stop any disbursement or payment under any existing agreements in relation to projects in the public sector, and any existing Technical Assistance Service Contracts. Member states will also be required to take actions to limit the involvement in Belarus of **multilateral development banks** of which they are members.

Today's decision fully implements the European Council conclusions of 24 and 25 May 2021, in which EU heads of state and government called on the Council to ban overflight of EU airspace by Belarusian airlines and prevent access to EU airports of flights operated by such airlines, and to adopt the necessary measures, including additional listings of persons and entities on the basis of the relevant sanctions framework, and to adopt further targeted economic sanctions. All of these measures have now been put in place.

Since October 2020, the EU has progressively imposed restrictive measures against Belarus. The measures have been adopted in response to the fraudulent nature of the August 2020 presidential elections in the country, and the intimidation and violent repression of peaceful protesters, opposition members and journalists. A total of **166 persons and 15 entities** are currently subject to restrictive measures, which comprise an asset freeze applicable to both individuals and entities, and travel ban on individuals.

[Latin Americans lodge far fewer applications for asylum in the EU+](#)

Asylum applications from six main origin countries in Latin America have fallen strongly since August 2020, possibly because of fewer flight connections to the EU+ and increased movements towards the United States.

Analysis [released](#) by the European Asylum Support Office (EASO) on asylum trends in April 2021 shows that **about 36 800 applications for international protection were lodged in the EU+ in April 2021.**¹ This was significantly fewer than in March (- 8 %) and the lowest level since last summer.

Apart from Syrians lodging fewer applications in April, the largest declines occurred for Venezuelans and Colombians. This reinforced a persistent downward trend of applications by Latin Americans. **From 9 000 in August 2020, total applications by nationals of Venezuela, Colombia, Honduras, Peru, El**

Salvador and Nicaragua have steadily fallen to 2 100 in April, for unclear reasons. The decline also contrasts with developments at the southwest border of the United States.² One factor may be that travel links to the EU+ have remained scarce. This may have prompted a redirection of migration towards the United States, possibly supported by expectations of changing U.S. policies.

Venezuela and Colombia no longer among the main origin countries

The top origin countries in April were Syria, Afghanistan, Pakistan, Iraq and Nigeria. For the first time since early 2018 (except April/May 2020), neither Venezuela nor Colombia was among the 10 main origin countries. In contrast, Malians (950) lodged the most applications since late 2017 and joined the 10 main origin countries for the first time in seven years. Moroccans (910) remained among the main applicant nationalities. **The high levels of applications not only by Malians and Moroccans but also by Senegalese and Gambians might partially reflect irregular migration on the Western African route to the Canary Islands.** Applications by Belarusians (220) were close to peak values in previous months.

More applications (1 500) were lodged by self-claimed unaccompanied minors in the EU+ in April 2021. They represented 4 % of the total applications in April, compared to 3 % so far this year. The increase primarily reflects more applications by unaccompanied minors from Afghanistan, who are by far the largest group.

Decisions issued by EU+ asylum authorities remain high

EU+ asylum authorities issued 50 000 first instance decisions in April, down from the peak in March but more than in previous months. As in March, about one in four first instance decisions concerned a repeated application, most of which had been lodged by Syrians. **First instance decisions in April continued to far exceed applications.**

The high level of decisions resulted in a slight fall of pending cases: some 364 100 cases were pending at first instance at the end of April, down by 6 % from the end of March. **The recognition rate³ in the EU+ was 27 % in April 2021.** Recognition rates were especially high for Eritreans (77 %) and Yemenis (74 %) but unusually low for Syrians (39 %) due to low recognition of their repeated applications.
