

Flood alerts

The Environment Agency has put a flood alert on the Emm brook but said they do not expect any property flooding in our area.

I have worked with the Agency and the Council on schemes to reduce flood risk. A lot of building has taken place on low lying land which can increase the pace of water run off swelling rivers and streams. Some remedial action has been taken, but more is needed.

When we get a lot of rain as recently it is a reminder that if new development goes ahead on low lying sites there needs to be substantial action to ensure safe water run off at a pace local water courses can accept without spilling above their banks.

Keeping watercourses and drains for surface water clear helps. In some cases when there is too much water it does need to settle on open land away from homes in the way water meadows used to work before all the building.
