

Funding boost to complete Llangefni Link Road

Investment announced today will enable the delivery of section 3 with a further £1.028 million being invested this financial year and up to £2.5 million provided in 2018-19, subject to an updated business case. This brings Welsh Government contribution in the scheme to over £10.6 million.

The Link Road, which is being delivered in four sections, is a key part of Grŵp Llandrillo Menai's masterplan to develop their Llangefni Campus as an internationally-renowned Energy and Engineering Training Facility.

The Link Road will also be important in mitigating the impact of traffic in Llangefni town centre.

The Cabinet Secretary officially opened sections 1 and 2 of the link road in March 2017. Section 4, the construction of new roundabout junction of the A5114 and the Bryn Cefni Industrial Estate road was opened to traffic in December.

The project as a whole has received funding from the Welsh Government, Isle of Anglesey County Council, Grŵp Llandrillo Menai and the Nuclear Decommissioning Authority.

Economy and Transport Secretary Ken Skates said:

"The Llangefni Link Road is a vital development which will not only enable Grŵp Llandrillo Menai to expand, but also improve access to Anglesey Enterprise Zone businesses and support the area to realise its potential for economic growth.

"All of this has been made possible thanks to a close working partnership between Welsh Government, Anglesey County Council, Grŵp Llandrillo Menai and the Nuclear Decommissioning Authority and is an excellent example of what can be achieved when everyone has the same goal in mind.

"I am delighted today's announcement will see this new route completed which will provide a big boost to the area and delivers on my commitment to improve our transport network to connect communities and businesses with jobs and services."

Anglesey Council's portfolio holder for Highways, Waste and Property, Councillor Bob Parry, said:

"We're delighted to have secured the funding needed to complete the final section of this important infrastructure project.

“The Llangefni Link Road will help secure significant economic benefits for Llangefni and Anglesey. It will provide a key driver for the expansion of the Grŵp Llandrillo Menai campus and further training opportunities for our young people. The project will also improve access to our Enterprise Zone sites and A55 expressway, and help overcome traffic constraints in Llangefni.

“I’d like to thank the Cabinet Secretary, Ken Skates, and the Welsh Government for their continued support in bringing this project to fruition.”

Dafydd Evans, CEO – Grŵp Llandrillo Menai said:

“The completion of the Llangefni link road will no doubt play an important role in the development of Llangefni, the Enterprise Zone and the surrounding region.

“For Grŵp Llandrillo Menai this project has already enabled us to embark on an ambitious plan to develop our campus in Llangefni.

“Construction of the new Engineering Centre is already well underway, it’s a development that will play a significant role in the future development and growth of the region and will ensure we have a skilled workforce to support the engineering and energy industry here on Anglesey for generations to come.”

Ruthin-based Jones Bros Civil Engineering UK will undertake the construction of final section after a competitive tender process with work expected to be completed towards the end of 2018.
