

Get on with it

There is still a long year to wait before we leave the EU. This is quite enough time to make any changes that are needed. The government assures us we will be ready to leave with No Deal if necessary.

I want the government to get on with the new borders, fishing, farming and trade policies we can enjoy once outside. I also want to hear how we will spend all the money we save. If we are going to delay our effective exit and give them more money in a prolonged transition there will need to be a very good deal to justify the delay. The message from many of us is Get on with it. Brexit will bring substantial benefits and opportunities.

We have a borders and trade system which works for the rest of the world at the moment, so we know how to live outside the EU.
