

Getting things done – Glamis Road

I am pictured below towards the top of the south section of Glamis Road :

At the request of residents, I asked the City Council for a safety traffic island at this location to complement the one north of the roundabout I previously successfully campaigned for and I am pleased to say this second island has been agreed to and will be installed in the spring.

Residents have also requested a similar island at the south end of Glamis Road and I have been advised by the City Development Department this will be considered along with other similar requests during 2017/18.
