

Getting things done – Perth Road #dundeewestend

Similarly to recent flooding at the bottom of Roseangle due to a blocked gully, a similar situation has recently existed on the Perth Road on its north side near to the bottom of Seymour Street. See photo below.

I therefore asked the City Council's Roads Maintenance Partnership to take appropriate action with a gully machine to resolve the issue here too.

I have since received the following helpful feedback :

“An order has been raised for the gully machine to attend.”
