

## Getting things done – Riverside Drive #dundeewestend

Recently, the traffic safety bollards in the middle of Riverside Drive, just north of the Botanic Garden, were damaged – apparently struck by a vehicle – see photo :

I reported this, at the request of residents, to the City Council and am grateful for the prompt response to put them back in place.

The council has further advised :

**“Tayside Contracts (is) ... going to replace them within the next month with new highly reflective bollards, but they’re back up for now.”**
