

At talks in Astana, UN envoy on Syria urges mechanism to oversee ceasefire

23 January 2017 – International talks to extend the ceasefire in Syria started today in the Kazakh capital of Astana, with the United Nations Special Envoy said the ceasefire can be solidified if a mechanism to oversee and implement it is created.

“The chances of success will be greater if the parties here are able to agree on a mechanism to oversee and implement nationwide ceasefire. A mechanism to oversee and implement a nationwide ceasefire,” said Staffan de Mistura. “We didn’t have it in the past, that’s the reason why often we failed.”

He encouraged the guarantors of the ceasefire to create a mechanism to implement the consolidation and de-confliction ceasefire measures, and “to see what else can be done to build confidence.”

Sitting alongside representatives of the Government of Syria and the Syrian opposition, Mr. de Mistura reiterated that the only way to end the conflict and secure a political solution is through negotiation among the Syrians.

The closed-door meeting “convened by Iran, Russia and Turkey, with a representative from the United States attending as an observer” is meant to end tomorrow.

The Special Envoy said that he hoped by strengthening the ceasefire at the Astana meeting “we could see in Geneva genuine intra-Syrian negotiations,” referring to the 8 February negotiations to be held under the auspices of the UN.

“I would hope direct negotiations between empowered and inclusive delegations of the Government and the opposition to take place,” Mr. de Mistura said, which include issues of “governance, constitution, elections” in the context of Security Council resolution 2254 (2015).

He praised the parties for the ceasefire announced by President Vladimir Putin and President Recep Tayyip Erdoğan, with support of Iran, in December for saving lives, and encouraged others to join.

“All other armed opposition groups not affiliated to terror organisations designated as such by the Security Council, in addition to groups allied with the Government, should also listen to the call to abide by the ceasefire,” Mr. de Mistura said.

Protection of civilians must be a crucial priority, he underscored, calling for the protection of civilian infrastructure, including hospitals, schools, water and electricity networks, and areas such as markets.

Syria: UNICEF calls for unimpeded aid access to children in besieged Deir ez-Zor

23 January 2017 – The United Nations Children’s Fund (UNICEF) today called for unimpeded and unconditional access to children in the besieged city of Deir ez-Zor, noting that they have not received regular humanitarian aid for more than two years.

UNICEF calls on all parties to the conflict in Syria to immediately lift all sieges and allow unimpeded and unconditional access to children in Deir ez-Zor and in all the 15 areas under siege across the country, said Geert Cappelaere, UNICEF’s Regional Director, in a statement.

According to UNICEF, children in Deir ez-Zor have come under intense attack in the past week, and indiscriminate shelling has reportedly killed scores of civilians and forced others to remain in their homes. The escalation of violence threatens the lives of 93,000 civilians, including over 40,000 children who have been cut off from regular humanitarian aid for over two years.

In addition, food prices have skyrocketed to levels five to ten times higher than in the capital, Damascus, and chronic water shortages are forcing families to fetch untreated water from the Euphrates River, exposing children to the risk of waterborne diseases.

Nothing justifies the use of siege and the untold suffering that it unleashes on children. The children of Syria have already paid the highest price for a war that is not of their making, Mr. Cappelaere said.

The Gambia: UN, ECOWAS, AU hail ‘goodwill’ of former President Jammeh; commit to work for his dignity and security

22 January 2017 – The United Nations, the Economic Community of West African States (ECOWAS) and the African Union (AU) have commended the goodwill

and the statesmanship of the former President of The Gambia, Yahya Jammeh, who decided to facilitate an immediate and orderly transition process and transfer of power to President Adama Barrow.

In a joint declaration late yesterday, UN, ECOWAS and AU pledged to work with the Government of The Gambia to ensure that it assures and ensures the dignity, respect, security and rights of former President Jammeh, as a citizen, a party leader and a former Head of State as provided for and guaranteed by the 1997 Gambian Constitution and other Laws of The Gambia.

The same also extended to the former President's immediate family, cabinet members, government and security officials, and party supporters and loyalists.

The declaration noted that former President Jammeh will temporarily leave the country, without any prejudice to his rights, to assist the peaceful and orderly transition and transfer of power and the establishment of a new government,.

Furthermore, the three organizations also said that they would work with the Government to ensure that no legislative action is taken against the former President and his entourage, as well as to prevent seizure of assets and properties lawfully belonging to them, and urged the authorities to take all necessary measures to ensure that there is no intimidation or harassment of former regime members and supporters.

They also pledged to work with Gambian authorities on national reconciliation to cement social, cultural and national cohesion.

The joint declaration further noted that the UN, ECOWAS and AU will work to ensure that host countries that offer African hospitality to former President Jammeh and his family do not become undue targets of harassment, intimidation and all other pressures and sanctions.

It added that the three organizations would also work the Government to ensure that former President Jammeh is at liberty to return to The Gambia at any time of his choosing in accordance with international human rights law and his rights as a citizen of The Gambia and a former head of state.

The joint declaration further noted that ECOWAS will halt any military operations in the country and will continue to pursue peaceful and political resolution of the crisis.

UN agency urges support for small farmers to help them not just get by, but thrive and feed others

22 January 2017 – Highlighting growing challenges, such as climate change and natural resource scarcity, facing small farmers in developing countries, the head of the United Nations agricultural agency called for information technology tools that can help boost their resilience as well as feed a growing world population.

“Millions of small family farmers need technical and financial assistance to be more resilient and adapt to the impacts of climate change,” said José Graziano da Silva, the Director-General of the UN Food and Agriculture Organization (FAO).

“They must be able to stay on their land, produce their own food and also have access to markets,” he added.

In his remarks at the G20 agricultural ministers meeting in the German capital, Berlin, Director-General Graziano da Silva noted that rural areas around the world will also be key in the implementation of the 2030 Agenda for Sustainable Development given that this where poverty and hunger are most concentrated.

At the same time, these increases in agricultural yields in these regions are required to feed a world population set to cross the 9-billion mark by 2050, and these will greatly depend on small family farmers, according to FAO studies.

Turning to the importance of information and communication technologies to build efficiency, resilience and inclusion of poor family farmers, the FAO Director-General spoke about the agency’s digital strategy that aims to support them through knowledge sharing and bottom-up learning.

As part of this strategy, the UN agency is working with Google to make high-resolution satellite data an everyday tool to monitor and manage natural resources, promote sustainable and strengthen food security. It is also engaging with the World Meteorological Organization (WMO) – the UN system’s weather agency – to improve weather forecasts for farmers, as well as exploring ways to provide small farmers with microclimate forecasts.

Mr. Graziano da Silva said that these efforts would be aimed at countries that do not have national meteorological services established and urged for support so that meteorological data, available at global level, can be translated at a local level to benefit farmers, pastoralists and fisherfolks.

Also in his remarks, the senior UN official hailed the G20 for its continuing focus on the issue of water scarcity and on antimicrobial resistance (AMR).

According to FAO estimates, almost 2.1 billion people live in the dry areas of the world and that some 260 million people, most of them in rural areas, lack access to safe drinking water.

Inviting G20 Members to participate in the Global Framework for Water Scarcity – launched by FAO and its partners at the recent UN Climate Conference in Marrakech, Morocco – that seeks to help countries and communities improve the efficiency of their water use and increase their resilience to drought.

On antimicrobial resistance, the head of FAO called on G20 support to the UN agency's efforts to promote responsible use of antibiotics in the agricultural sector to prevent the spread of resistance.

Antimicrobial resistance occurs when microorganisms (such as bacteria, fungi, viruses and parasites) change, developing resistance, as they are exposed to antimicrobial drugs (such as antibiotics, antifungals, antivirals, antimalarials and anthelmintics) used to treat the infections they cause. As a result, the medicines become ineffective and infections persist, become harder to treat and increase the risk of spreading.
