

Going the extra historical mile

The milestones, two on the A616 at Midhopstones in South Yorkshire and four on the A64 near Scampston Hall and East Heslerton in North Yorkshire, are restored thanks to Highways England's environment designated fund.

Back in the 19th century, the road network was developed for the use of horse and cart and milestones were installed to tell people how far they were from particular places.

Over the years many of these mileposts have been damaged or were removed during the world wars. Widening of the roads in the 20th century for vehicle use also removed many of these features. It is thought around 1,300 still exist on Yorkshire roads.

Highways England project manager Chris Dunn said:

Milestones were the sat navs of their day and they are recognised for their historical significance so it is important that we preserve them for the future.

We were able to restore these six milestones by repainting them to reduce rust so they won't deteriorate further. We have also cleared the excess vegetation that has grown around them so they can be easily spotted and appreciated.

Highways England's £300 million environment fund creates environmental opportunities alongside the road network and addresses historical environmental issues. The work was carried out in accordance with the English Heritage guidance.

General enquiries

Members of the public should contact the Highways England customer contact centre on 0300 123 5000.

Media enquiries

Journalists should contact the Highways England press office on 0844 693 1448 and use the menu to speak to the most appropriate press officer.
