

# Government follows up on positive results of sewage surveillance and appeals to residents to undergo virus testing

The Government announced today (January 31) that in order to fight the coronavirus epidemic, the Environmental Protection Department and the Drainage Services Department in collaboration with the cross-disciplinary team of the University of Hong Kong had strengthened the sampling of sewage for virus testing in all districts, and had detected positive results in many areas, indicating that there may be hidden cases in the premises within these areas.

## Compulsory testing

In response to the positive sewage testing results in Kowloon City and Mong Kok, the Government exercises the power under the Prevention and Control of Disease (Compulsory Testing for Certain Persons) Regulation (Cap. 599J) and publishes in the Gazette a compulsory testing notice, requiring any person who had been present at the following specified premises (See Annex) during the specified period to undergo a COVID-19 nucleic acid test –

- Sheung Ching House, Kai Ching Estate
- Sewage Testing Area YTM Site 116 (Area around Shanghai Street near Fife Street, Mong Kok.)

The Government strongly reminds members of the public to strictly follow the compulsory testing requirements and undergo testing on time as required. The Government will knock on doors at the specified premises to notify residents of the compulsory testing requirement. Mobile testing stations will be set up as far as possible to ensure testing are conducted in compliance with the compulsory testing notice. The above compulsory testing requirement applies to those who have completed a COVID-19 vaccination course as well. They are advised to closely monitor their health conditions. They should seek medical attention and undergo testing even if they have only mild symptoms.

Details of the compulsory testing notice are available on the website of the Centre for Health Protection, the Department of Health, via [www.chp.gov.hk/en/features/105294.html](http://www.chp.gov.hk/en/features/105294.html) .

## Rapid test

As regards positive sewage testing results in Tai Po, Tsuen Wan and

Kowloon City, the Home Affairs Department (including Tai Po District Office) will distribute COVID-19 rapid test kits to residents in the following areas starting from tomorrow (February 1) for them to take the test on their own, in order to help identify infected persons –

- Tsui Wo House, Tai Wo Estate, Tai Po

In addition, the Government will distribute three sets of COVID-19 rapid test kits to all cleansing workers and property management staff working in the following areas (see Annex) through the Hong Kong Property Services Alliance and the Hong Kong Association of Property Management Companies for them to take the test on their own, in order to help identify infected persons. The Government appeals to residents and those working in these areas who have been exposed to infection risks to undergo testing on a voluntary basis to achieve "early identification, early isolation and early treatment"

–

- Sewage Testing Area Tsuen Wan Site 3A (Area around Luk Yeung Sun Chuen, Shek Wai Kok Estate, Cheung Shan Estate)
- Sewage Testing Area Kowloon City Site 1 (Area around Kai Ching Estate, Kai Long Court and Vibe Centro)

Residents may refer to ([www.youtube.com/watch?v=XjLzD3-gab4](http://www.youtube.com/watch?v=XjLzD3-gab4)) for enquiries relating to the use of the rapid test kits.

If positive test result is shown on the test kit, medical attention should be sought at the Accident and Emergency Departments promptly to receive appropriate diagnosis and treatment at the earliest possible time. Residents tested positive should stay home as far as possible to avoid spreading the virus in the community. The Government stresses that rapid test kit testing is not a substitute for the compulsory testing requirement. Individuals who are in doubt about their own health condition, who have visited places with epidemic outbreaks or have had contact with persons tested positive, etc, should undergo testing promptly at testing centres.
