

# Green Party leader Zack Polanski responds to Palestine Action ruling

13 February 2026 by [Green Party](#)

“The court has ruled that the government’s authoritarian ban on Palestine Action was unlawful. Now it is time for the government to stop criminalising the people protesting a genocide – and start ending the UK’s complicity.

“Over 2,700 people have so far been arrested for holding a sign opposing genocide and the proscription of Palestine Action. Those already charged should have those charges dropped, and the Crown Prosecution should discontinue action against all those arrested.”
