

Green Party reacts to government plans to house migrants on barges and in army camps

29 March 2023

Green Party co-leader Carla Denyer said:

“Detaining desperate people on boats, barges and disused military bases is the latest outrage in a calculated attempt by government to dehumanise asylum seekers as part of its election strategy.

“Together with the Illegal Immigration Bill that will cast adrift thousands of people seeking protection in this country, these proposals will cause real harm to already vulnerable people.

“The humane alternative is an asylum system that works. That is one with clear, open, safe and legal routes for applicants, quick and efficient determinations and support for resettlement into local communities with properly funded local services.”
