

# Greens slam 'ridiculous and costly plan' for Heathrow

25 November 2025 by [Green Party](#)

Responding to news that [the government is backing Heathrow's £49 billion proposal that will require the M25 to be moved](#), Green MP Siân Berry said:

"This Government is so pathetically in the pocket of Heathrow bosses and the most wealthy frequent flyers, that it will support this ridiculous and costly plan for expansion, despite the miserable disruption it will cause to everyone else's daily lives.

"These plans will trash our vital climate targets, and meanwhile cause misery on the roads, all for the benefit of the very richest people.

"This Labour Government must fix its twisted priorities, ditch the aviation obsession, and invest its effort instead in a real green future with high-paid green jobs, warmer homes, and cheaper bills."
