

Farm fined after worker struck and injured by bull

A dairy farm has been fined after a farm worker was struck by a bull and suffered a serious leg injury.

Kidderminster Magistrates Court heard how, on 23 August 2016, the 28-year-old T N Beeston and Son employee entered the shed in which the cows were kept to clear it out when he was struck by a dairy bull at Moreton Hall Farm. The worker, who arrived to work at the farm a year beforehand, suffered a serious leg injury which required an operation.

An investigation by the Health and Safety Executive (HSE) found that the mature dairy bull was housed with cows in a cubicle shed which farm workers had to enter three times a day to clear out, while the bull was loose in the same enclosure.

The investigation found that a suitable bull pen, with means of restraint, was not provided on the farm to ensure workers did not have to enter an area occupied by the bull. Mature dairy bulls are large animals and can be unpredictable and aggressive. The farm's risk assessment identified a risk from the unrestrained bull but failed to identify adequate controls, even though there were clear signs that the bull was getting more difficult to handle.

T N Beeston and Son, of Moreton Hall Farm, Morton Say, Market Drayton pleaded guilty to breaching section 2(1) of the Health and Safety at Work etc. Act 1974. The company was fined £16,000 and ordered to pay costs of £3,079

HSE inspector Wendy Campbell said after the hearing, "Farmers have a responsibility to assess risks from their cattle and provide suitable housing and handling facilities to ensure that bulls are excluded from areas where they or their employees work. Farm workers should never enter an enclosure when a bull is loose."

Two companies fined after worker run over by a telehandler

Bellway Homes Ltd and A D Bly Construction Ltd have today been fined after a worker was struck by a telehandler.

Basildon Magistrates' Court heard how, on 14 July 2015, a grounds worker was run over by a telehandler whilst undertaking work in the middle of the construction site road. The grounds worker was fortunate that he passed under the body of the reversing telehandler, and not under the wheels, which would have likely resulted in his death. The resulting injuries include chipped vertebra, muscular and tendon damage and the worker has been diagnosed with post-traumatic stress disorder (PTSD).s

An investigation by the Health and Safety Executive found both the principal contractor, Bellway Homes, and subcontractor, A D Bly Construction failed in their duties to effectively plan, manage and monitor control measures to address the risks associated with construction site vehicles. The investigation also found they failed to manage and control the risk of persons being struck by a vehicle on their construction site.

A D Bly Construction Ltd of Nup End Business Centre, Old Knebworth pleaded guilty to breaching Regulation 15(2) of Construction (Design and Management) Regulations 2015 and has been fined £26,000 and ordered to pay costs of £5,271.38.

Bellway Homes Ltd of Seaton Burn House, Dudley Lane pleaded guilty to breaching Regulation 13(1) of Construction (Design and Management) Regulations 2015 and has been fined £31,500 and ordered to pay costs of £48,600.

Speaking after the case, HSE Inspector Ian Shearring said: "The risks associated with construction vehicles is well-known and both companies failed in their duties to address these. Both Bellway Homes as the principal contractor, and A D Bly as subcontractor, have today been held to account for failing to take adequate action to protect the health and safety of persons working on their site."

Company fined £1million after delivery driver killed

A plastic product manufacturer has been fined £1million after a delivery driver was fatally injured.

Cambridge Crown Court heard how Gareth Wilson, a delivery driver for Mark Doel Transport Ltd, was fatally injured when he was struck by a fork lift truck which had large coils suspended from the forks.

An investigation by the Health and Safety Executive (HSE) found Glynwed Pipe Systems Ltd failed to properly manage workplace transport in the yard area where employees and members of the public were exposed to the risk of being hit. The investigation also found that the systems of work in place were not, so far as is reasonably practicable, safe.

Glynwed Pipe Systems Ltd of St Peter's Road, Huntingdon, Cambridgeshire pleaded guilty to breaching Regulation 2(1) and 3(1) of the Health and Safety at Work etc. Act 1974 and have been fined £1million and ordered to pay costs of £27,942.57

Speaking after the hearing HSE inspector Roxanne Barker said: "There are more than 5,000 accidents involving transport in the workplace every year, and, like in this case, sadly some of which are fatal.

"The HSE investigation found the yard was not organised to allow safe circulation of people and traffic as appropriate routes were not identified and therefore insufficient in number. A properly implemented Traffic Management Plan should have identified sufficient measures for the separation of vehicles and people including protected walkways, clear signage and barriers."

Company and director sentenced after scaffolder seriously injured

A scaffolding company and its managing director have today been sentenced after one of its scaffolders suffered a serious injury whilst taking down a scaffold.

Brighton Magistrates' Court heard how LS Scaffolding was contracted to erect a scaffold and temporary roof over a pair of houses to enable the conversion of the lofts. While dismantling the roof of the structure at the site on Upton Court Road, Slough, a worker fell and broke his femur.

An investigation by the Health and Safety Executive (HSE) into the incident, that occurred on 28 July 2016, found that LS Scaffolding Ltd regularly used untrained workers and failed to ensure scaffold structures were designed by competent persons. The investigation also found that the company and its director failed to ensure the work on a complex scaffold was properly planned, supervised or carried out.

LS Scaffolding Ltd of Vicarage Farm Road, Hounslow pleaded guilty to breaching Regulations 4 (1) and 8(b) (ii) of The Work at Height Regulations 2005. The company was fined £47,000 and ordered to pay costs of £7,371 with a £170 surcharge.

Lakhbir Khakh, director of LS Scaffolding Ltd of Stanwell Gardens, Staines pleaded guilty to breaching two counts of Section 37 of the Health and Safety at Work etc. Act 1974 and was sentenced to 18 weeks custodial sentence suspended for 12 months and was fined £1,700 with a £115 surcharge.

After the hearing, HSE inspector Dominic Goacher commented: "It is essential that scaffolding companies ensure that non-standard scaffolds are safely erected to a design produced by a competent scaffold engineer and that safe systems of work are planned and used by competent workers."

HSE food manufacturing inspections target the causes of workplace ill-health

Companies and people working in food manufacturing are being told they must pay closer attention to how they manage workplace health risks or face serious penalties.

The Health and Safety Executive's (HSE) programme of proactive inspections will review health and safety standards in food manufacturing businesses across the country, and the sector is being warned that a programme of unannounced inspections will begin today.

The inspections will focus on two of the main causes of ill-health in the sector which are currently occupational asthma from exposure to flour dust in bakeries, cake and biscuit manufacturers and grain mills and musculoskeletal disorders (MSDs) – predominantly lower back pain and upper limb disorders from manual handling activities and repetitive tasks across the sector.

The inspection visits come as HSE recently released its Manufacturing sector plan which prioritises the reduction of cases of occupational lung disease and MSDs.

Exposure to flour dust is the UK's second most common cited cause of occupational asthma. MSDs are the most common type of work-related illness in food manufacturing with handling injuries, accounting for around 20% of reported employee injuries (RIDDOR). HSE insists that such ill-health can be prevented when organisations have proper risk control systems in place.

The inspections will ensure measures are being taken by those responsible to protect workers against health risks and HSE will not hesitate to use enforcement to bring about improvements.

HSE's head of Manufacturing Sector John Rowe, said: "The food manufacturing

sector is made up of over 300,000 workers and its health and safety record needs to improve. This inspection initiative will look to ensure effective management and control of targeted health risks.

HSE is calling on anyone working in the industry to take the time to refresh their knowledge of our advice and guidance, available for free on our website.

Food manufacturing companies should do the right thing by protecting workers' health; everyone has the right to go home healthy from work."
