

Hong Kong Customs manages community isolation facility in Yuen Long

â€‹The Yuen Long community isolation facility, constructed with Mainland support, has been handed over to the Hong Kong Special Administrative Region Government yesterday (March 24). Co-ordinated by the Security Bureau's anti-epidemic task force, the 10-hectare facility, with a total of about 9 400 beds in more than 2 000 units for isolation purposes, is managed by Hong Kong Customs.

In response to challenges arising from the epidemic, Hong Kong Customs will continue to make all-out efforts to remain steadfast and support Hong Kong citizens throughout the difficult epidemic period.
