

Import of poultry meat and products from District of Börde in State of Sachsen-Anhalt in Germany suspended

The Centre for Food Safety (CFS) of the Food and Environmental Hygiene Department announced today (April 1) that in view of a notification from the World Organisation for Animal Health (OIE) about an outbreak of highly pathogenic H5N8 avian influenza in the District of Börde in the State of Sachsen-Anhalt in Germany, the CFS has instructed the trade to suspend the import of poultry meat and products, including poultry eggs, from the district with immediate effect to protect public health in Hong Kong.

A CFS spokesman said that Hong Kong imported about 4 780 tonnes of frozen poultry meat and 2.9 million poultry eggs from Germany last year, according to the Census and Statistics Department.

"The CFS has contacted the German authorities over the issue and will closely monitor information issued by the OIE on avian influenza outbreaks. Appropriate action will be taken in response to the development of the situation," the spokesman said.
