

Import of poultry meat and products from Ostrowski District of Mazowieckie Region in Poland suspended

The Centre for Food Safety (CFS) of the Food and Environmental Hygiene Department announced today (May 3) that in view of a notification from the General Veterinary Inspectorate of Poland about an outbreak of highly pathogenic H5N8 avian influenza in Ostrowski District of Mazowieckie Region in Poland, the CFS has instructed the trade to suspend the import of poultry meat and products (including poultry eggs) from the district with immediate effect to protect public health in Hong Kong.

A CFS spokesman said that according to the Census and Statistics Department, Hong Kong imported about 2 920 tonnes of frozen poultry meat and about 12.06 million poultry eggs from Poland in the first three months of this year.

"The CFS has contacted the Polish authorities over the issues and will closely monitor information issued by the World Organisation for Animal Health and the relevant authorities on the avian influenza outbreaks. Appropriate action will be taken in response to the development of the situation," the spokesman said.
