

[LCSD launches event search engine on homepage \(with photo\)](#)

The Leisure and Cultural Services Department (LCSD) launched an event search engine on its homepage (www.lcsd.gov.hk/en/index.html) today (April 1) for members of the public to browse the LCSD's highlight events conveniently.

Listing out the highlight programmes of each day in the form of a calendar enables members of the public to view the respective event information, including the website links, time and location by clicking on a selected date. The event search engine can help people make better plans for their free time. Apart from the in-person events, the search engine also includes the "vis-à-vis +01" series online programmes. Staying at home or going out, people can join the LCSD's online and offline programmes to gain knowledge in the fields of leisure, sports, arts and culture.

Highlight events in April include the Online Hong Kong Flower Show 2021 and HK SciFest 2021. All are welcome to visit the LCSD homepage and utilise the event search engine to look for and participate in one's favourite programmes.
