

Local rail improvements

I am all in favour of providing more seats and more train capacity locally for passengers. I have been pressing for better services.

I have recently been sent the plans for a two platform station at Green Park, and told of the works to extend the platforms at Wokingham to take longer trains.

The new Green Park stop will be between Reading and Mortimer on the Basingstoke line, near Kirtons Farm Road. The idea is to run a half hourly train service in each direction when it is completed.

If constituents have views on either of these projects please let me know.
