

Press release: New raptor persecution maps to help tackle wildlife crime

[Raptor persecution maps for England and Wales](#) have been published to enable the police to clearly see where the highest incidents are taking place and focus enforcement efforts in the areas that need it most.

The maps present the number of shootings, trappings, poisonings and nest destructions that took place across England & Wales between 2011 and 2015 and will be updated annually, providing an invaluable intelligence tool to help fight crimes against birds of prey.

North Yorkshire will be a priority area as the most incidents occurred there (39), followed by Norfolk (17), Cumbria (11), Derbyshire (11), Lincolnshire (10), Suffolk (8) and Northumberland (8).

Wildlife Minister Thérèse Coffey said:

Birds of prey are a vital part of our animal landscape, icons of our cultural heritage and key to boosting local economies by attracting visitors to England and Wales.

These maps highlight hotspots across the country for crimes against these precious birds, enabling the police to crack down with increased enforcement in areas where it's needed most – building on the valuable work land management, conservation and shooting organisations are already doing to help protect iconic birds of prey.

There are already strong penalties in place for committing offences against birds of prey and the unlawful use of traps and all wild birds are protected under the Wildlife and Countryside Act 1981.

The Government takes all wildlife crime very seriously and raptor persecution has been identified as a UK wildlife crime priority. Each priority has a delivery group to consider what action should be taken, develop a plan to prevent crime, gather intelligence on offences and enforce against it.

The [National Wildlife Crime Unit](#) also monitors and gathers intelligence on illegal activities affecting raptors and provides assistance to police forces when required.

These maps build on this valuable work and will help boost the fight against those who continue to commit crimes against raptors. In the five year measurable period there have been 262 incidents in England and Wales: 146 of these caused by shooting and 66 by poisoning.

The majority of incidents took place against buzzards (108), followed by owls

(40), red kites (39) and peregrine hawks (34).

In January 2016 the government published the [Hen Harrier Action Plan](#) and the new maps will help support the six positive actions outlined in the plan, which are already underway. Today's maps show one incident involving Hen harriers.

The maps were developed by the [Raptor Persecution Priority Delivery Group](#), which includes Defra, the Devolved Administrations, [Natural England](#), National Wildlife Crime Unit, the police, [British Association for Shooting and Conservation](#), [RSPB](#), [Country Land and Business Association](#), [Moorland Association](#), [National Game Keepers' Organisation](#), [National Parks England](#), [Crown Prosecution Service](#) and [the Countryside Alliance](#).
