

Protocol for updating the Evidence database of the Best Practice Portal

EMCDDA, Lisbon, December 2020

Summary

The Evidence database is a core component of the EMCDDA's Best Practice Portal. The portal is a resource for professionals, policymakers and researchers in the drugs field and provides information on the available evidence on drug-related prevention, treatment and harm reduction, focusing on the European context. The evidence is compiled following an explicit methodological process which is described in this document.
