

Provisional statistics on index of industrial production and producer price index for industrial sector for second quarter of 2018

According to the provisional results of a survey released today (September 13) by the Census and Statistics Department (C&SD), the index of industrial production for manufacturing industries as a whole increased by 1.6% in the second quarter of 2018 compared with a year earlier, following a year-on-year increase of 1.1% in the first quarter of 2018. The corresponding producer price index also increased by 3.8% in the second quarter of 2018 compared with a year earlier, after recording a 3.8% year-on-year increase in the first quarter of 2018 as well.

The index of industrial production for sewerage, waste management and remediation activities increased by 3.1% in the second quarter of 2018 compared with a year earlier, following a year-on-year increase of 1.6% in the first quarter of 2018. The corresponding producer price index also increased by 4.3% in the second quarter of 2018 compared with a year earlier, following a year-on-year increase of 5.9% in the first quarter of 2018.

Indices of industrial production reflect changes in the volume of local industrial output after discounting the effect of price changes. The price changes are measured by the producer price indices compiled from data on producer prices of selected industrial goods/services collected in the same survey.

Comparing the industrial production in respect of major manufacturing industries in the second quarter of 2018 with that a year earlier, an increase in output volume was recorded mainly in the food, beverages and tobacco industry (+3.2%). On the other hand, a decrease in output volume was recorded in the metal, computer, electronic and optical products, machinery and equipment industry (-1.3%).

On a seasonally adjusted basis, the index of industrial production for manufacturing industries as a whole increased by 0.6% in the second quarter of 2018 compared with the first quarter of 2018.

Producer price indices reflect changes in the prices of local output. They measure changes in the actual prices (net of any discounts or rebates allowed to buyers, plus any surcharges) received by producers for their output. Transportation and other incidental charges are not included.

Comparing the second quarter of 2018 with a year earlier, increases in producer prices were recorded for all major manufacturing industries. The metal, computer, electronic and optical products, machinery and equipment industry had the largest increase in producer prices (+5.1%), followed by the

paper products, printing and reproduction of recorded media industry (+2.8%); the food, beverages and tobacco industry (+1.6%); and the textiles and wearing apparel industry (+1.4%).

Table 1 shows the year-on-year percentage changes in the indices of industrial production by selected industry grouping. Table 2 shows the year-on-year percentage changes in the producer price indices for the industrial sector by selected industry grouping.

The revised figures on indices of industrial production and producer price indices for the industrial sector for the second quarter of 2018 will be released at the website of the C&SD

(www.censtatd.gov.hk/hkstat/sub/bbs.jsp) and relevant publications of the department starting from October 19, 2018.

Users can download the reports "Quarterly Index of Industrial Production, 2nd Quarter 2018" (www.censtatd.gov.hk/hkstat/sub/sp310.jsp?productCode=B1070002) and "Quarterly Producer Price Index for Industrial Sector, 2nd Quarter 2018" (www.censtatd.gov.hk/hkstat/sub/sp280.jsp?productCode=B1070003) free of charge at the website of the C&SD.

Readers who have enquiries about the survey results may contact the Industrial Production Statistics Section of the C&SD (Tel: 3903 7247; fax: 2123 1048; email: ind-production@censtatd.gov.hk).
