RAF Typhoons test NATO ground based air defence capability

ROYAL AIR FORCE TYPHOONS TEST NATO□ GROUND BASED AIR DEFENCE CAPABILITY

Royal∏

Air Force (RAF) Typhoon aircraft have been playing their part in a□ multinational exercise to test NATO's capability to command and control ground□

based systems to defend the skies.

$RAF \sqcap$

Typhoons are deployed to Romania as part of the NATO enhanced Air Policing $\mathsf{in} \mathsf{\sqcap}$

partnership with Romania. However there□

are other dimensions to securing the skies above NATO and the RAF has been \cDots playing its part with training sorties to help the UK, Romanian and US forces deployed \cDots

on Exercise Tobruq Legacy at Capu Midia firing range near Constanta.

×

In the∏

work up before live firing exercises one of the Typhoon pilots from 3(F) squadron said: "We gave them two targets today. We came at them from different

evasive turns to test them to their maximum ability."

He∏

added: "It's not an opportunity they are going to get very often to get to $\mathsf{trv} \sqcap$

and track and target a Typhoon. It's a□ good opportunity to work across the nations."

Exercise□

Tobruq Legacy is an NATO exercise involving 2200 personnel and over 800□ vehicles in Lithuania, Romania and the Czech Republic. The purpose is to improve□

the level of interoperability of multinational Surface-Based Air and Missile□ Defence systems forces.

×

3(F)∏

Squadron from Coningsby in Lincolnshire is deployed to Mihail Kogalniceanu $\operatorname{air}\square$

base near Constanta in Eastern Romania as part of the RAF's 135 <code>Expeditionary[</code>

Air Wing on a NATO mission to enhance Air Policing over Romania.

Enhanced□

members how NATO provides the cornerstone of collective defence.
