

# Recording of the week: the seabirds of Bempton Cliffs

*This week's selection comes from Cheryl Tipp, Curator of Wildlife & Environmental Sounds.*

If you find yourself in East Yorkshire during the summer holidays, be sure to pay a visit to the stunning seabird colonies at [Bempton Cliffs](#). Every year nearly half a million seabirds congregate on the hard chalk cliff faces in order to breed. Numbers are at their highest between April and August, when Gannets, Kittiwakes, Guillemots, Razorbills, Fulmars, Puffins and gulls jostle for the best positions along the precipitous ledges. This recording, made by Richard Margoschis in 1990, captures all the excitement of this busy community.

You can listen to more wildlife and environmental recordings in the [Environment and Nature](#) section of [British Library Sounds](#).
