

Research and analysis: ACRE advice: application for a trial of GM Adenovirus 4 (16/R49/01)

This document is the Advisory Committee on Releases to the Environment (ACRE's) advice to government in considering a [request from Imperial College London \(16/R49/01\)](#). The application is for a deliberate release of genetically modified virus (the vaccine) based on Adenovirus 4.

ACRE is satisfied that the trial will not have an adverse effect on human health or the environment.
