

Research and analysis: Updated energy and emissions projections: 2017

The report contains projections of UK performance against national greenhouse gas targets under existing policies. It includes projections of the demand for each type of fuel in different sectors of the economy. The publication discusses the projected demand for electricity and indicates what mix of generation will meet it.

All enquiries about the projections should be sent to:

emissionsprojections@beis.gov.uk

Please note that we are unable to provide any breakdown of projected renewable electricity generation, capacity or new build by technology.
