

On 19 October, Dmitry Medvedev will meet with President of Croatia Kolinda Grabar-Kitarovic in Moscow

During their conversation, Russian Prime Minister and Kolinda Grabar-Kitarovic will discuss current issues of Russian-Croatian trade, economic and investment cooperation, as well as cooperation in the energy, industrial and cultural sectors.

The President of the Republic of Croatia will be in Russia on an official visit at the invitation of the Russian President.

Implementing the comprehensive project to create and develop a campus of the St Petersburg National Research University of Information Technology, Engineering and Optical Design

The campus of the St Petersburg National Research University of Information Technology, Engineering and Optical Design will be built in the Pushkin District of St Petersburg. The campus will include research centres, laboratories, classrooms, housing, and other buildings. The new campus will accommodate 3,600 students, 50 international laboratories, and at least five innovation-driven production facilities which will create 6,000 new high-skill jobs.

Reference

Prepared by the Ministry of Communications.

The signed directive supports the proposal of the St Petersburg Government to implement an investment project in the city's Pushkin District, providing, among other things, for the creation and development of a university campus of the federal state autonomous institution of higher education St Petersburg National Research University of Information Technology, Engineering and Optical Design (hereinafter referred to as "project" and "ITMO University," respectively).

The project concept provides for building the ITMO University campus to

include research centres, laboratories, classrooms, housing, and other buildings. The planned area under construction amounts to about 400,000 square metres.

In accordance with the project's benchmarks, the new ITMO University campus will accommodate 3,600 students, 50 international laboratories, and at least five innovation-driven production facilities which will create 6,000 new high-skill jobs.

Approval was also granted to the proposal of the Ministry of Communications to create the joint stock company Highpark of the St Petersburg National Research University of Information Technology, Engineering and Optical Design to oversee the project's implementation. It will have an authorised capital of 321 million roubles, fully owned by the federal government.

[Meeting of the International Advisory Board of the Moscow School of Management](#)

The Moscow School of Management Skolkovo is a private business school that was established on September 27, 2006 within the framework of the Education Priority National Project as a public-private partnership. The Skolkovo School is one of the largest private business schools in Russia and the CIS.

The school is managed by the International Advisory Board, which is chaired by Prime Minister Dmitry Medvedev, together with the Coordination Council, which consists of 18 founding partners that are the largest Russian and foreign companies in the oil and gas, steel, power generation, investment as well as banking sectors.

Briefing by Maxim Oreshkin and Ernst & Young's Managing Partner for Russia Alexander Ivlev following the FIAC meeting

Excerpts from the transcript:

Maxim Oreshkin: Good afternoon, colleagues,

The Foreign Investment Advisory Council's annual meeting was held today. It's an important event where we can discuss issues facing companies that have invested significant amounts of money in the Russian market, and ways of changing regulations to improve the local business environment.

Today's meeting was held in a generally positive atmosphere given that the Russian economy has begun to recover, and economic growth is underway. Companies can see this in their performance indicators.

An Ernst & Young study revealed an interesting fact, where the number of investment projects in Russia this year has reached an all-time high. We see this from the direct investment dynamics, which reached \$14 billion in the first half of 2017. In other words, all numbers are telling us that foreign business is actively coming to Russia again and has a vision of long-term development goals for itself.
