

# Press release: Change of Her Majesty's High Commissioner to the Federal Republic of Nigeria

Ms Catriona Laing CB has been appointed British High Commissioner to the Federal Republic of Nigeria in succession to Mr Paul Arkwright who will be transferring to another Diplomatic Service appointment. Ms Laing will take up her appointment in November 2018.

## **Curriculum Vitae**

Full name: Catriona Wendy Campbell Laing

Married to: Clive David Nicholas Bates

Children: One daughter

2014 to present Harare, Her Majesty's Ambassador

2013 to 2014 FC0, various specialised projects including in Crisis Management Department, and as additional Deputy Head of Mission in Moscow

2012 to 2013 Helmand, Head of Mission and NATO and UK senior civilian representative

2009 to 2012 Ministry of Justice, Director, Human Rights and International

2006 to 2009 Khartoum, Head, Department for International Development (DFID)

2005 to 2006 DFID, Head, International Division Advisory Department

2001 to 2005 Cabinet Office, Deputy Director, Prime Minister's Strategy Unit

2000 DFID, Globalisation White paper team

1999 to 2000 DFID, Head, Eastern Europe, Western Hemisphere Policy Department

1996 to 1998 DFID, Team Leader, European Union and International Economics Policy Department

1995 to 1996 Cranfield University, MBA Course

1994 to 1995 DFID, Economic Adviser, Latin America, Caribbean and Atlantic Department

1993 to 1994 UN Mission in Somalia, Head, UN Development Office

1992 to 1993 Overseas Development Administration (ODA), Economic Adviser, Aid Policy Department

1990 to 1991 ODA, Assistant Economist, British Development Division East Africa

1989 to 1990 ODA, Assistant Economist, West Africa Department

1986 to 1989 Botswana, Planning Office in Ministry of Works, Transport and Communications

## [Press release: School children flood in for new defences tour](#)

Engineers went back to school to give youngsters in Teesside a tour of new multi-million pound flood defences which protect their community from flooding.

Pupils at High Clarence Primary School were shown around the state-of-the-art £4.5million flood defences at Port Clarence which reduce the risk of flooding from the River Tees.

And they saw first-hand the £11million scheme, currently under construction, which reduces the risk of flooding from Greatham Creek and will create 30 hectares of new habitat for wildlife to thrive.

Together the projects protect 350 homes and 32 businesses at Port Clarence from flooding.

Pupils travelled on the Transporter Bridge across the River Tees to get a bird's eye view of the flood defences, while at Greatham they got to see workers in action building new flood embankments – and even got to see the popular seals!

The event, which took place last week (Friday, 8 June), also gave local residents the opportunity to find out more about the scheme, while MP Alex Cunningham was also given an insight into how the defences work to protect

his constituency.

## Great project with innovative features

Phil Marshall, the Environment Agency's Senior Advisor on the project, said:

It's really important the community understands how the flood defences at Port Clarence work together with the scheme at Greatham Creek to reduce their risk of flooding.

It's a great project with lots of innovative features and the added benefit of creating extra habitat for wildlife in a vital conservation area.

Our future generations will play an important role in ensuring our communities are resilient as we deal with the impacts of climate change and it was great to show the school pupils this great engineering and habitat creation project. Hopefully it will inspire them to want to make a difference!

The first phase of the project was completed in December 2015 and saw new flood defences built in Port Clarence, consisting of a mixture of earth embankments, flood walls, and a raised section of the road on the approach to the Transporter Bridge.

In addition, the Environment Agency worked together with local business

Wilton Engineering to install removable steel flood defences along the River Tees. This improves flood protection while still allowing Wilton to operate from the river.

Work started on the second phase in summer 2017 and involves raising existing flood embankments along Greatham Creek.

## Managed realignment

There is also a managed realignment of part of the current flood defences. This means a new embankment to the north of the RSPB Saltholme Nature Reserve has been built around a larger area of land, and then the existing flood embankment will be breached later this year.

This results in the creation of around 30 hectares of intertidal habitat to the north of the nature reserve. It's a popular area frequented by seals, and a variety of bird species including shelduck, knot and redshank.

The Environment Agency is working with local businesses in the area, with SABIC UK providing funding towards the scheme and INOVYN ChlorVinyls providing some of their land for the additional habitat creation. Phil added:

Work is progressing well and is expected to be completed this autumn. The local businesses in the area know only too well how devastating it is to be flooded having been affected by the tidal surge in December 2013.

By working together with industry we're vastly improving existing defences to protect residents and businesses and reduce the risk of flooding now and into the future as sea levels start to rise. This has been quite a unique partnership and I can't emphasise enough the benefits this will bring for the area.

The Environment Agency has also been working closely with partners at RSPB and Natural England to design and build a scheme which maximises benefits for the internationally designated habitat, and to ensure disruption to wildlife and visitors to the local area is kept to a minimum.

Contractors BAM Nuttall and Mott MacDonald Joint Venture (BMMJV), are carrying out the work on behalf of the Environment Agency.

If you would like to know more about your risk of flooding and how to be prepared call Floodline on 0345 988 1188, or visit [the Floods Destroy website](#)

[\*\*News story: Media intelligence merger\*\*](#)

## could raise competition concerns

Nielsen and Ebiquity gather, collate and analyse information on the advertising activity of companies.

Both companies are the only suppliers of this intelligence across a broad range of UK media. While they face some competition from firms offering this service for digital advertising, no firm competes with Nielsen and Ebiquity for detailed intelligence across all UK media channels.

The Competition and Markets Authority (CMA) therefore found competition may be significantly reduced if the merger went ahead as planned.

The CMA also found that the companies are each other's closest competitor in the supply of intelligence on international advertising to UK customers, and that they face only limited competition from other suppliers for this service.

Nielsen and Ebiquity have until 20 June to offer a solution to the competition concerns raised by the CMA, otherwise it will go ahead with a more in-depth (phase 2) investigation.

## Press release: New start-up visa route announced by the Home Secretary

The new route, announced during London Tech Week, will widen the applicant pool of talented entrepreneurs and make the visa process faster and smoother for entrepreneurs coming to the UK. It will replace a visa route which was exclusively for graduates, opening it up to a wider pool of talented business founders.

It will require applicants to have acquired an endorsement from a university or approved business sponsor, including accelerators.

Entrepreneurs play a key role in creating jobs and driving economic growth in the UK and the changes announced today will ensure the UK remains a world-leading destination for the best global talent.

The visa route has been designed following advice from the Migration Advisory Committee and feedback from the tech sector and other stakeholders.

The Home Secretary, Sajid Javid, said:

The UK can be proud that we are a leading nation when it comes to

tech and innovation, but we want to do more to attract businesses to the UK and our migration system plays a key part in that.

That's why I am pleased to announce a new visa for people wanting to start a business in the UK. This will help to ensure we continue to attract the best global talent and maintain the UK's position as a world-leading destination for innovation and entrepreneurs.

This initiative builds on other recent reforms to the visa system – including doubling the number of visas available on the Exceptional Talent route to 2,000 per year – and shows the government's commitment to making the UK a dynamic, open, globally-trading nation.

The expanded route will launch in Spring 2019, further details will be announced in due course.

## **Press release: £2.3 billion boost and 1,600 jobs created as UK tech goes global**

The Prime Minister will host a raft of cutting-edge companies for a roundtable, as part of London Tech Week, to showcase Britain as the best place in the world to run a tech company. This event kicks off a series of roundtables to drive inward investment in key sectors.

Companies announcing investment today include:

- Salesforce, who are investing of \$2.5 billion in the UK over the next five years, which will include the opening of a second UK data centre in 2019
- Mubadala, who are launching £300 million European investment fund based in the UK
- NTT data who are investing £41million to open a new office and Innovation Centre, creating up to 200 jobs over the next three years

The Prime Minister will in turn make a number of commitments so that tech companies will also benefit from government funding, and greater access to talent and data under new plans.

These announcements will include:

- a new £2.5 billion British Patient Capital programme, which is expected to attract a further £5 billion in private investment, to support UK companies with high growth potential to access the long-term investment

they need to grow and go global

- a new Start-Up Visa for entrepreneurs will launch in Spring 2019. This will replace a visa route which was exclusively for graduates, opening it up to talented business founders. This will include accelerators playing a role in the endorsement of candidates
- Roger Taylor will be announced as Chair of the Centre for Data Ethics and Innovation, alongside a consultation on the role of the Centre – a key part of plans for a new National Data Strategy
- opening up key parts of the Ordnance Survey's valuable geospatial data to small businesses for free to boost competition in the digital economy
- two new Tech Hubs will be launched in Brazil and South Africa, to build innovative partnerships and develop skills, capability and business networks in these markets

Over 180 tech founders, entrepreneurs and investors will also attend a reception at Downing Street this evening, which will celebrate the UK's position as a world-leading destination for tech investment.

Britain is leading Europe in tech investment as evidenced last week when Amazon announced the creation of 2,500 jobs, and yesterday when Big Commerce announced that it will open its first European office in London this year. BT also announced yesterday that it has built the UK's first practical quantum-secured high-speed fibre network between Cambridge and Ipswich.

Last year, British tech businesses attracted \$7.8 billion of funding, almost double the amount received in 2016, compared to France and Germany's combined total of \$6 billion and the Prime Minister will reaffirm that the UK's leadership is set to grow as our modern Industrial Strategy drives further investment in centres of UK expertise.

Some 2.1 million people are now employed in the digital tech economy and a new digital tech job is created in the UK every 50 minutes, according to new estimates released this week by Dealroom and Tech Nation.

Founders Forum, who will be in Downing Street today, will also launch a new start-up competition across UK secondary schools and universities to inspire the next generation of entrepreneurs.

Prime Minister Theresa May said:

The measures we are announcing today will allow innovative British start-ups to invest in their future – and in the UK – by hiring more skilled people, expanding their business and exporting their expertise across the world.

It's a great time to be in tech in the UK, and our modern Industrial Strategy will drive continued investment, ensuring the nation flourishes in the industries of the future and creating more high-paying jobs.

Chancellor Philip Hammond said:

The UK is home to some of the world's most innovative companies and I want to make sure that they stay at the forefront of the tech revolution. So, British Patient Capital will provide an extra £2.5 billion for these cutting-edge business ensuring Britain remains one of the best places to start and grow a company.

International Trade Secretary Dr Liam Fox said:

The UK is already a world-leading destination for tech investment with one tech start-up opening every 50 minutes. Our tech sector, with our strong legal system, skilled workforce and low taxation economy combine with our world class universities to make us the most attractive home for investment in Europe.

As an international economic department, DIT will continue to encourage investment from overseas with a further series of events to attract inward business. Last month we launched a new online portfolio of opportunities worth £30 billion, and in turn this will drive growth and create jobs in our economy.

Culture Secretary, Media and Sport Matt Hancock said:

Britain is a digital dynamo with the government and tech sector working together to help make this country the best place in the world to start and grow a digital business. We're encouraging the best and brightest tech talent to come to the UK and creating the right conditions for our high growth digital businesses to thrive.

We are spearheading digital innovation in exciting areas such as Artificial Intelligence and our network of tech hubs will connect us with some of the leading emerging technology nations across the world to share best practice.
