

SEPA invites you to help ensure Tyre Sector Plan is on the right track

📅 12 October 2018

Everyone with an interest in the environment is being encouraged to share their views on SEPA's sector plans for tyres.

- SEPA is consulting on its sector plan for tyres which will encourage innovation and shape how the agency regulates the industry.
- With approximately 100 tyres turned into waste every 15 minutes in Scotland SEPA is committed to working with partners to eliminate the problem of waste tyres.
- Consultees are being urged to have their say on the plans before 20 November.

Everyone with an interest in the environment is being encouraged to share their views on SEPA's sector plans for tyres.

SEPA's sector plans will be at the heart of everything the agency does and will shape its interactions with sectors and the businesses in them. The sector plan for tyres aims to bring a clear and co-ordinated approach to regulation, focusing SEPA on delivery and using its staff more powerfully to engage.

Scotland's registered 2.9 million vehicles generate more than 4.2 million used tyres per year, 84% of which are light van and passenger vehicle tyres.

With approximately 100 tyres turned into waste every 15 minutes in Scotland SEPA launched a major strategic partnership last year to eliminate the problem of waste tyres.

The tyre sector plan is the next step in encouraging the industry to create economic opportunities from the resource as well as tackling the ongoing waste tyre issue and criminal behaviours the industry can attract. SEPA is clear that compliance is non-negotiable. The ambitious sector plan will support the agency to build upon its work to reduce the potential impacts which the illegal storage of waste tyres can have on the environment, local communities and legitimate businesses and will make sure all operators meet minimum standards.

The sector plan outlines how SEPA proposes to work with businesses to turn challenges into environmental opportunities from the design and production of tyres, to extending and prolonging the valuable life of tyres on vehicles, to innovative new ways to recycle and recover value from waste tyres.

Consultees have until 20 November 2018 to share their views on the sector plan for tyres which is available on [SEPA's Consultation Hub](#).

Terry A'Hearn, SEPA's Chief Executive, said:

“Every day SEPA works to protect and enhance Scotland’s environment and we are clear that compliance is non-negotiable. We are transforming our regulatory approach in order to create a world-class environment protection agency fit for the challenges of tomorrow, and sector planning will drive this new approach.

“This sector plan is an important next step in eliminating the problem of waste tyres and presents many opportunities encouraging businesses to think about going beyond compliance and creating commercial success from environmental excellence and innovation in the industry.

“It is important that we have the views of as many people as possible across Scotland on the sector plan for tyres to ensure we get this right. If you have an interest in the environment please read the documents and tell us what you think.”
