

Annual science review 2016-17

The 2016-17 BGS annual science review is now available to view online.

Limestone landscapes

Limestone landscapes is a set of web pages providing information about the geography and geology of upland and lowland limestone regions of England.

Climate through time online

Climate through time (CTT) online is an interactive version of the popular poster map, but includes examples of where you might find some of the rock types in the UK and Ireland.

New research using hydrogen aims to take the carbon out of heating

The British Geological Survey (BGS) will lead the case study to support the decarbonisation of heating for large UK cities using novel hydrogen-based technology in the recently funded ELEGANCY research project. This project is one of five supported by the UK Department for Business, Energy and Industrial Strategy (BEIS) with co-funding from the EU.
