Career Opportunites

welters® are seeking motivated and enthusiastic people to join their expanding organisation.

Opportunities are being created across all departments with full, part time and freelance positions now available covering all aspects of activities from administration and sales, to technical, design, marketing and consultative posts as well as factory based production and development work and peripatetic site construction and support work.

Positions are not restricted locally either with **welters®** recognising the advantages of recruiting talented individuals worldwide as remote working contributors to the organisation.

Manufacturing operatives

required at our Carlisle based factory. Experience in construction industry, specifically with concrete product manufacturing, would be an advantage but not a requirement. A wide range of opportunities available at all levels.

Site installation team positions

available nationally. Must be willing to work away from home. Skilled and ticketed applicants would be an advantage but not essential.

Administration, Finance, Procurement, Design Team and E-marketing

opportunities available for inspired, enthusiastic applicants.

We are an equal opportunities employer and welcome applications from all suitably qualified persons regardless of their race, sex, disability, religion/belief, sexual orientation or age

Please email your CV to:
admin@welters-worldwide.com

welters July Company News

The popularity of **welters**® proprietary Stone Memorial Orbs continues with additional interests from multiple Burial Authorities. The unique aspect of the orbs enables them to be offered in situ as a facility for cremated remains interment, with the option to renew or be removed by the family at the end of the leased term. This creates a sustainable perpetuation of new orb placements and a continuation of income generation over time. The Stone Orbs are equally suited to both formal and naturalised settings.

The company has recently completed the provision of 57 single interment burial chambers for the Muslim community in an East Midlands cemetery. This is but one of several similarly large installations the company has provided elsewhere so far this year. The demand for burial chamber interment is increasing as is the requirement to provide above-ground facilities such as sarcophagi and mausolea.

Planning is underway to provide additional phases across a number of **welters**® **Cemetery Village** installations where below ground burial chambers, above ground mausolea, sarcophagi and cremated remains facilities are combined to create a harmonious integration of interment choices. These types of schemes are now well established and a proven model to achieve not only a respectful and meaningful place of interment and commemoration, but also the economic advancement of the Burial Authority going forward.

welters Partnership Programmes deliver results

The company is pleased to announce that two new Local Authorities are now benefitting from **welters**® Cemetery Village partnership programmes. As a

leading force in the design and installation of innovative burial and memorialisation systems, **welters**® prides itself on creating viable working partnerships with Local and private Burial Authorities to achieve long term solutions and economic advancement. Before the advent of our proprietary interment and memorial systems, many local Authorities considered cemeteries to be an unprofitable burden and a drain on resources. With the introduction of WOW burial chambers, memorial systems and mausolea facilities the fortunes of these cemeteries has been transformed into aesthetic and viable commodities generating real income and enhancing service provision.

welters® have been developing and manufacturing products for a wide variety of purposes for over 30 years in this industry. By combining traditional skills such as sculpture and art with modern computerised design, the company has established the ability to produce high end results at an extremely competitive output. Using this marriage of 'old and new' the company can create modern design protected and proprietary alternatives to historically high cost processes, delivering low cost products of good design and build.
