

Appeal for information on missing man in Tuen Mun (with photo)

Police today (January 6) appealed to the public for information on a man who went missing in Tuen Mun.

Wong How-ming, aged 61, went missing after he was last seen in Sun Fung Wai, Tuen Mun in April, 2019. His family made a report to Police on September 26, 2019.

He is about 1.75 metres tall, 45 kilograms in weight and of thin build. He has a pointed face with yellow complexion and short straight black and white hair.

Anyone who knows the whereabouts of the missing man or may have seen him is urged to contact the Regional Missing Person Unit of New Territories North on 3661 3127, 6273 5787 or email to rmpu-ntn-1@police.gov.hk, or contact any police station.

Suspected MERS case reported

The Centre for Health Protection (CHP) of the Department of Health today (January 6) reported a suspected case of Middle East Respiratory Syndrome (MERS), and again urged the public to pay special attention to safety during travel, taking due consideration of the health risks in the places they visit. The case is detailed below:

Sex	Female
-----	--------

Age	7
Affected area involved	Saudi Arabia
High-risk exposure	Nil
Hospital	Princess Margaret Hospital
Condition	Stable
MERS-Coronavirus preliminary test result	Pending

"Travellers to the Middle East should avoid going to farms, barns or markets with camels; avoid contact with sick persons and animals, especially camels, birds or poultry; and avoid unnecessary visits to healthcare facilities. We strongly advise travel agents organising tours to the Middle East to abstain from arranging camel rides and activities involving direct contact with camels, which are known risk factors for acquiring MERS Coronavirus (MERS-CoV)," a spokesman for the CHP said.

Locally, the CHP's surveillance with public and private hospitals, with practising doctors and at boundary control points is firmly in place. Inbound travellers and members of the public who recently visited the Middle East and developed relevant symptoms within 14 days will be classified as suspected MERS cases. They will be taken to public hospitals for isolation and management until their specimens test negative for MERS-CoV.

Travellers to affected areas should maintain vigilance, adopt appropriate health precautions and take heed of personal, food and environmental hygiene. The public may visit the MERS pages of the [CHP](#) and its [Travel Health Service](#), MERS statistics in [affected areas](#), the CHP's [Facebook Page](#) and [YouTube Channel](#), and the World Health Organization's [latest news](#) for more information and health advice. Tour leaders and tour guides operating overseas tours are advised to refer to the CHP's [health advice on MERS](#).

[Update on cases of Legionnaires' disease](#)

The Centre for Health Protection (CHP) of the Department of Health today (January 6) reported the latest number of cases of Legionnaires' disease (LD), and stressed the importance of using and maintaining properly designed man-made water systems, adding that susceptible groups should strictly observe relevant precautions.

From December 29 last year to January 4 this year, two community-

acquired LD cases were reported:

1. A male patient, aged 54 with underlying illnesses, who lives in Tower 1B, Cullinan West, 28 Sham Mong Road, Cheung Sha Wan; and
2. A male patient, aged 64 with underlying illnesses, who lives in Block 1, Belvedere Garden Phase 3, 625 Castle Peak Road, Tsuen Wan.

"Epidemiological investigations are ongoing to identify potential sources of infection, high-risk exposure and clusters, if any," a spokesman for the CHP said.

In 2020 (as of January 4), no LD case has been recorded so far. In 2019, 105 LD cases were reported. In 2018 and 2017, there were 105 and 72 cases respectively.

"Men, people aged over 50, smokers, alcoholics and persons with weakened immunity are more susceptible to LD. Some situations may also increase the risk of infection including poor maintenance of water systems leading to stagnant water; living in areas with old water systems, cooling towers or fountains; using electric water heaters, whirlpools and spas or hot water spring spas; and recent stays in hotels or vessels," the spokesman said.

Legionellae are found in various environmental settings and grow well in warm water (20 to 45 degrees Celsius). They can be found in aqueous environments such as water tanks, hot and cold water systems, cooling towers, whirlpools and spas, water fountains and home apparatus which support breathing. People may become infected when they breathe in contaminated droplets (aerosols) and mist generated by artificial water systems, or when handling garden soil, compost and potting mixes.

Immunocompromised persons should:

- Use sterile or boiled water for drinking, tooth brushing and mouth rinsing;
- Avoid using humidifiers, or other mist- or aerosol-generating devices. A shower may also generate small aerosols; and
- If using humidifiers, or other mist- or aerosol-generating devices, fill the water tank with only sterile or cooled freshly boiled water, and not water directly from the tap. Also, clean and maintain humidifiers/devices regularly according to manufacturers' instructions. Never leave stagnant water in a humidifier/device. Empty the water tank, wipe all surfaces dry, and change the water daily.

The public should observe the health advice below:

- Observe personal hygiene;
- Do not smoke and avoid alcohol consumption;
- Strainers in water taps and shower heads should be inspected, cleaned, descaled and disinfected regularly or at a frequency recommended by the

manufacturer;

- If a fresh water plumbing system is properly maintained, it is not necessary to install domestic water filters. Use of water filters is not encouraged as clogging occurs easily, which can promote growth of micro-organisms. In case water filters are used, the pore size should be 0.2 micrometres (μm) and the filter needs to be changed periodically according to the manufacturer's recommendations;
- Drain and clean water tanks of buildings at least quarterly;
- Drain or purge for at least one minute infrequently used water outlets (e.g. water taps, shower heads and hot water outlets) and stagnant points of the pipework weekly or before use;
- Seek and follow doctors' professional advice regarding the use and maintenance of home respiratory devices and use only sterile water (not distilled or tap water) to clean and fill the reservoir. Clean and maintain the device regularly according to the manufacturer's instructions. After cleaning/disinfection, rinse the device with sterile water, cooled freshly boiled water or water filtered with 0.2 μm filters. Never leave stagnant water in the device. Empty the water tank, keep all surfaces dry, and change the water daily; and
- When handling garden soil, compost and potting mixes:
 1. Wear gloves and a face mask;
 2. Water gardens and compost gently using low pressure;
 3. Open composted potting mixes slowly and make sure the opening is directed away from the face;
 4. Wet the soil to reduce dust when potting plants; and
 5. Avoid working in poorly ventilated places such as enclosed greenhouses.

The public may visit the CHP's [LD page](#), the [Code of Practice for Prevention of LD](#) and the [Housekeeping Guidelines for Cold and Hot Water Systems for Building Management](#) of the Prevention of LD Committee, and the CHP's [risk-based strategy](#) for prevention and control of LD.

[LegCo to debate motions on incident of assaults occurred in MTR Yuen Long Station on July 21, 2019](#)

The following is issued on behalf of the Legislative Council Secretariat:

The Legislative Council (LegCo) will hold a meeting on Wednesday (January 8) at 11 am in the Chamber of the LegCo Complex. During the meeting, Mr Lam Cheuk-ting and Ms Claudia Mo will move two separate motions under the Legislative Council (Powers and Privileges) Ordinance, in relation to the

incident of assaults occurred in Yuen Long Station of West Rail Line of the MTR Corporation Limited on July 21, 2019. The motions are set out in Appendices 1 and 2 respectively.

Mr Alvin Yeung, Dr Kwok Ka-ki and Mr Kwong Chun-yu will move three separate motions under Article 73(5) and (10) of the Basic Law and the Legislative Council (Powers and Privileges) Ordinance, in relation to the incident of assaults occurred in Prince Edward Station of the MTR Corporation Limited on 31 August 2019. The motions are set out in Appendices 3-5 respectively.

Ms Tanya Chan, Dr Kwok Ka-ki, Dr Fernando Cheung and Mr Kenneth Leung will move seven separate motions under Article 73(5) and (10) of the Basic Law and the Legislative Council (Powers and Privileges) Ordinance, in relation to the Police's handling of protesters and persons performing duties in the protests during the "anti-extradition to China" movement. The motions are set out in Appendices 6-12 respectively.

Mr Chung Kwok-pan and Dr Priscilla Leung will also move two separate motions under the Legislative Council (Powers and Privileges) Ordinance, in relation to the causes and consequences of the social conflicts or disturbances arising from the amendments to the Fugitive Offenders Ordinance and related matters. The motions are set out in Appendices 13 and 14 respectively. Mr James To will move an amendment to Dr Priscilla Leung's motion.

Meanwhile, Mr Dennis Kwok will move a motion on no confidence in the Fifth Term Government of the Hong Kong Special Administrative Region as set out in Appendix 15. Ms Claudia Mo will move an amendment to Mr Dennis Kwok's motion.

Mr Ho Kai-ming will move a motion on ensuring children's right to play for them to grow up happily. The motion is set out in Appendix 16. Mr Ip Kin-yuen, Dr Kwok Ka-ki, Dr Fernando Cheung, Dr Chiang Lai-wan and Mr Hui Chi-fung will move separate amendments to Mr Ho Kai-ming's motion.

On Government Bills, the Court Proceedings (Electronic Technology) Bill and the Employment (Amendment) Bill 2019 will be introduced into the Council for the First Reading and the Second Reading. The Second Reading debate on the Bills will be adjourned.

During the meeting, Members will also ask the Government 21 questions on various policy areas, six of which require oral replies.

The agenda of the above meeting can be obtained via the LegCo Website (<http://www.legco.gov.hk>). Please note that the agenda is subject to change, and the latest information about the agenda could be found on the LegCo Website.

Members of the public are welcome to observe the proceedings of the meeting from the public galleries of the Chamber of the LegCo Complex. They may reserve seats by calling 3919 3399 during office hours. Members of the

public can also watch or listen to the meeting via the Webcast system on the LegCo Website.

Public hospital daily update on Wuhan-related cases

The following is issued on behalf of the Hospital Authority:

As at noon today (January 6), in the past 24 hours public hospitals had admitted six patients who have been to Wuhan in the past 14 days and presented with fever, respiratory infection or pneumonia symptoms, including a male patient and a female patient who had attended a general practitioner and a private hospital respectively.

	Hospital	Age	Gender	Condition
1.	United Christian Hospital	9	Male	Stable
2.	Queen Elizabeth Hospital	2	Male	Stable
3.	Queen Elizabeth Hospital	65	Male	Stable
4.	Alice Ho Miu Ling Nethersole Hospital	5	Female	Stable
5.	Prince of Wales Hospital	20	Female	Stable
6.	Tuen Mun Hospital	41	Female	Stable

The Hospital Authority (HA) has reported the cases and sent the specimens to the Department of Health (DH) for testing. The patients concerned are being treated under isolation. "The patients concerned had not visited wet markets in Wuhan before the onset of symptoms. All of them are in stable condition. The HA will keep monitoring the patients' conditions and provide appropriate treatment," the HA Chief Infection Control Officer, Dr Raymond Lai, said.

Including the above-mentioned cases, public hospitals have reported 21 patient cases to the DH since December 31, 2019. Seven of the patients have been discharged.
