

## Police appeal to all staying in Hong Kong Polytechnic University to leave in a peaceful manner

As there are still some rioters remaining on campus of the Hong Kong Polytechnic University, Police today (November 24) appeal to all those who remain to leave in a peaceful manner. Police have all along emphasised two fundamental principles: “peaceful solution” and “flexibility”.

In response to those in need, Police have arranged medics and clinical psychologists to provide assistance on campus.

For those under 18 years old, Police will arrange an appropriate adult to accompany them when they leave the campus, without arresting them. They are required to be photographed and have their personal particulars registered. Police reserve every right to pursue or take any legal actions in the future.

In order to re-open the campus as soon as practicable, Police appeal to all staying in the campus to leave in a peaceful manner and pledge to bring offenders to justice in a fair manner.

## Health risk category for Air Quality Health Index may reach "Serious" level

The Environmental Protection Department (EPD) has recorded a gradual increase in pollution levels since this morning. According to the EPD forecast, it is expected that the AQHI at some general and roadside air monitoring stations may reach the "Serious" level later today (November 24).

The weather in Hong Kong today is fine and dry with some hazy, and with moderate east to northeasterly winds. Hong Kong is under the influence of a high background pollution airstream. The sunshine enhances photochemical smog activity and the rapid formation of ozone in the Pearl River Delta region. The high level of ozone has also promoted the formation of nitrogen dioxide.

According to the Hong Kong Observatory, the northeast monsoon will bring cooler weather to the south China coastal areas in the next couple of days. It will be windy with one or two rain patches over the region. It is expected that pollution levels will improve by then.

With a health risk category in the "Very High" range or above, children, the elderly and persons with existing heart or respiratory illnesses are advised to reduce physical exertion and outdoor activities to a minimum or avoid such activities. The general public are advised to reduce, or reduce to a minimum, outdoor physical exertion, and to reduce time staying outdoors, especially in areas with heavy traffic. As health effects of air pollutants may vary for individuals, persons who are in doubt or experience discomfort should seek advice from health-care professionals. The public may visit the Centre for Health Protection's website ([www.chp.gov.hk/en/content/9/460/3557.html](http://www.chp.gov.hk/en/content/9/460/3557.html)) for more information on health effects of air pollution and relevant health advice.

The Education Bureau (EDB) urges all schools to visit the EDB's website for appropriate measures to safeguard students' health and take note of changes in the index. The relevant hyperlink is as follows: [www.edb.gov.hk/en/sch-admin/admin/about-activities/sch-activities-gui](http://www.edb.gov.hk/en/sch-admin/admin/about-activities/sch-activities-gui)

[delines/index.html](#).

When the AQHI is at the "Very High" level, employers of outdoor workers performing heavy manual work are advised to assess the risk of outdoor work and take appropriate preventive measures to protect the health of their employees such as reducing outdoor physical exertion and the time of their stay outdoors, especially in areas with heavy traffic. At the "Serious" level, employers of all outdoor workers are advised to assess the risk of outdoor work and take appropriate preventive measures to protect the health of their employees.

Members of the public can check the current AQHI readings at the EPD's website ([www.aqhi.gov.hk/en.html](http://www.aqhi.gov.hk/en.html)) or by calling the hotline 2827 8541.
