

HAD to open temporary night heat shelters

The Home Affairs Department will open 18 temporary night heat shelters tonight (August 6) for people in need of the service.

The shelters will be open from 10.30pm until 8am tomorrow.

For further information, please call the department's enquiries hotline before midnight on 2835 1473.

The 18 night heat shelters are located at:

Hong Kong Districts:

Central and Western –

Sai Ying Pun Community Complex Community Hall
3/F, Sai Ying Pun Community Complex,
2 High Street, Sai Ying Pun

Eastern/Wan Chai –

Causeway Bay Community Centre
Waiting Lobby, 3/F, 7 Fook Yum Road, Causeway Bay

Southern –

Lei Tung Community Hall
Lei Tung Estate, Ap Lei Chau

Kowloon Districts:

Kowloon City –

Hung Hom Community Hall
Multi-purpose Room, 1/F, Kowloon City Government Offices,
42 Bailey Street, Hung Hom

Kwun Tong –

Lam Tin (West) Estate Community Centre
71 Kai Tin Road, Lam Tin

Sham Shui Po –

Shek Kip Mei Community Hall
G/F, Block 42, Shek Kip Mei Estate,
Nam Cheong Street, Sham Shui Po

Wong Tai Sin –

Tsz Wan Shan (South) Estate Community Centre

Hall, G/F, 45 Wan Wah Street, Tsz Wan Shan

Yau Tsim Mong –
Henry G Leong Yaumatei Community Centre
60 Public Square Street, Yau Ma Tei

New Territories Districts:

Islands –
Tung Chung Community Hall
G/F, Tung Chung Municipal Services Building,
39 Man Tung Road, Tung Chung

Kwai Tsing –
Kwai Shing Community Hall
Podium, Block 6, Kwai Shing West Estate, Kwai Chung

North –
Cheung Wah Community Hall
Cheung Wah Estate, Fanling

Sai Kung –
Hang Hau Community Hall
G/F, Sai Kung Tseung Kwan O Government Complex,
38 Pui Shing Road, Hang Hau, Tseung Kwan O

Sha Tin –
Lung Hang Estate Community Centre
Lung Hang Estate, Sha Tin

Tai Po –
Tai Po Community Centre
2 Heung Sze Wui Street, Tai Po

Tsuen Wan –
Lei Muk Shue Community Hall
G/F, Hong Shue House, Lei Muk Shue Estate, Tsuen Wan

Tuen Mun –
Butterfly Bay Community Centre
Butterfly Estate (near Tip Sum House), Tuen Mun

Yuen Long –
Long Ping Community Hall
Long Ping Estate, Yuen Long

Yuen Long –
Tin Yiu Community Centre
Tin Yiu Estate, Tin Shui Wai

The temporary night heat shelters will resume their functions as either community centres or community halls in the daytime for hire by the local community and cannot continue to be open as heat shelters. People may choose to take refuge from the heat during the daytime in the common areas in any of the 21 designated community centres or community halls. Their opening hours are from 9am to 10pm. For addresses of the community centres or community halls, please browse the following webpage:

FS to visit two cities of Guangdong-HK-Macao Bay Area

The Financial Secretary, Mr Paul Chan, will visit two cities of the Guangdong-Hong Kong-Macao Bay Area, namely Shenzhen and Dongguan.

Mr Chan will depart for Shenzhen tomorrow (August 7) and return in the afternoon on the next day (August 8). While in Shenzhen, he will call on senior officials of the Shenzhen Municipal Government, visit local innovation and technology companies, meet with Hong Kong youths there and attend a dinner hosted by representatives of the Hong Kong business sector in Shenzhen. During his absence, the Secretary for Commerce and Economic Development, Mr Edward Yau, will act as Financial Secretary.

He will then visit Dongguan on Thursday (August 9) and return to Hong Kong in the evening on the same day. Apart from meeting with senior officials of the Dongguan Municipal Government, he will visit Songshan Lake Xbot Park and local enterprises.

Soft ice-cream sample detected with coliform bacteria exceeding legal limit

The Centre for Food Safety (CFS) of the Food and Environmental Hygiene Department today (August 6) announced that a soft ice-cream sample was found to contain coliform bacteria exceeding the legal limit. Follow-up is in progress.

"Following up on a food complaint, the CFS collected the above-mentioned soft ice-cream sample from a restaurant in Quarry Bay for testing. The test result showed that the sample contained coliform bacteria of 180 per gram, exceeding the legal limit," a spokesman for the CFS said.

Under the Frozen Confections Regulation (Cap 132AC), each gram of frozen confection for sale should not contain more than 100 coliform bacteria. The maximum penalty for offenders is a fine of \$10,000 and three months' imprisonment upon conviction. The fact that the coliform bacteria exceeded the legal limit indicated that the hygienic conditions were unsatisfactory, but did not mean that consumption would lead to food poisoning.

"The CFS has informed the vendor concerned of the irregularity and instructed it to stop selling the affected product immediately. The CFS has also provided health education on food safety and hygiene to the person-in-charge and staff of the vendor concerned, and has requested them to carry out thorough cleaning and disinfection. Should there be sufficient evidence, prosecution will be initiated," the spokesman said.

The CFS will continue to follow up on the case and take appropriate action to safeguard food safety and public health. Investigation is ongoing.

Effective Exchange Rate Index

The effective exchange rate index for the Hong Kong dollar on Monday, August 6, 2018 is 104.2 (up 0.1 against last Saturday's index).

The effective exchange rate index for the Hong Kong dollar on Saturday, August 4, 2018 was 104.1 (down 0.5 against last Friday's index).

Update on cases of Legionnaires' disease

The Centre for Health Protection (CHP) of the Department of Health today (August 6) reported the latest number of cases of Legionnaires' disease (LD), and stressed the importance of using and maintaining properly designed man-made water systems, and that susceptible groups should strictly observe relevant precautions.

From July 29 to August 4, three community-acquired LD cases were reported. They are:

1. A male patient, aged 51 with underlying illnesses, who lives in Tower 2, The Metropolis Residence, 9 Metropolis Drive, Kowloon City;
2. A male patient, aged 53 with underlying illnesses, who lives in Toa Yuen House, Chuk Yuen (North) Estate, 8 Wing Chuk Street, Wong Tai Sin; and
3. A male patient, aged 58 with good past health, who lives in Man Wo Garden Mansion, 38 Yuet Wah Street, Kwun Tong.

"Epidemiological investigations are ongoing to identify potential sources of infection, high-risk exposure and clusters, if any," a spokesman for the CHP said.

As of August 4, 51 LD cases have been reported in 2018. In 2017 and 2016, there were 72 and 75 cases respectively.

"Men, people aged over 50, smokers, alcoholics and persons with weakened immunity are more susceptible to LD. Some situations may also increase the risk of infection, including poor maintenance of water systems leading to stagnant water; living in areas with old water systems, cooling towers or fountains; using electric water heaters, whirlpools and spas or hot water spring spas; and recent stays in hotels or vessels," the spokesman said.

Legionellae are found in various environmental settings and grow well in warm water (20 to 45 degrees Celsius). They can be found in aqueous environments such as water tanks, hot and cold water systems, cooling towers, whirlpools and spas, water fountains and home apparatus which support breathing. People may get infected when they breathe in contaminated droplets (aerosols) and mist generated by artificial water systems, or when handling garden soil, compost and potting mixes.

Immunocompromised persons should:

- Use sterile or boiled water for drinking, tooth brushing and mouth rinsing;
- Avoid using humidifiers, or other mist- or aerosol-generating devices. A shower may also generate small aerosols; and
- If using these devices, fill the water tank with only sterile or cooled freshly boiled water, and not tap water. Also, clean and maintain them regularly according to manufacturers' instructions. Never leave stagnant water. Empty the water tank, wipe all surfaces dry, and change the water daily.

The public should observe the health advice below:

- Observe personal hygiene;
- Do not smoke and avoid alcohol;
- Strainers in water taps and shower heads should be inspected, cleaned, descaled and disinfected regularly or at a frequency recommended by the

manufacturer;

- If a fresh water plumbing system is properly maintained, it is not necessary to install domestic water filters. Use of water filters is not encouraged as clogging occurs easily, which can promote growth of micro-organisms. In case water filters are used, the pore size should be 0.2 micrometres (μm) and the filter needs to be changed periodically according to the manufacturer's recommendations;
- Drain and clean water tanks of buildings at least quarterly;
- Drain or purge for at least one minute the infrequently used water outlets (e.g. water taps, shower heads and hot water outlets) and stagnant points of the pipework weekly or before use;
- Seek and follow medical advice regarding the use and maintenance of home respiratory devices and use only sterile (not distilled or tap) water to clean and fill the reservoir. Clean and maintain them regularly according to the manufacturer's instructions. After cleaning/disinfection, rinse the device with sterile water, cooled freshly boiled water or water filtered with 0.2- μm filters. Never leave stagnant water. Empty the water tank, keep all surfaces dry, and change the water daily; and
- When handling garden soil, compost and potting mixes:
 1. Water gardens and compost gently using low pressure;
 2. Open composted potting mixes slowly and make sure the opening is directed away from the face;
 3. Wet the soil to reduce dust when potting plants; and
 4. Avoid working in poorly ventilated places such as enclosed greenhouses.

The public may visit the CHP's [LD page](#), the [Code of Practice for Prevention of LD](#) and the [Housekeeping Guidelines for Cold and Hot Water Systems for Building Management](#) of the Prevention of LD Committee, and the CHP's [risk-based strategy](#) for prevention and control of LD.
