

Mui Wo Temporary Public Fill Reception Facility will be reopened

Attention TV/radio announcers:

Please broadcast the following as soon as possible:

As the Hong Kong Observatory has cancelled all typhoon warning signals, the Civil Engineering and Development Department today (June 16) announced that the Mui Wo Temporary Public Fill Reception Facility will be reopened at 8.30am for public use.

Pending fighting in a public place and death on arrival case in Cheung Sha Wan reclassified as affray and manslaughter

Police reclassified a pending fighting in a public place and death on arrival case in Cheung Sha Wan yesterday (June 14) as affray and manslaughter.

At 3.07am yesterday, Police received a report that several men were suspected of disputing and fighting at the junction of Hing Wah Street and Shun Ning Road, and at 3.10am, Police received a report that a man was found lying on the ground at the same place.

Police officers sped to the scene and located the 68-year-old man lying on the ground outside 27E Hing Wah Street. He was rushed to the Caritas Medical Centre in unconscious state and was certified dead at 4.03am.

Upon further investigation, Police reclassified the case as affray and manslaughter and arrested five men and four women, aged 27 to 44, for affray in various districts yesterday and today (June 15), a 39-year-old man was also arrested for manslaughter. Among the arrestees, two men and one woman, all aged 37, have been laid a holding charge each with one count of affray, the 39-year-old man has been laid a holding charge with one count of affray and one count of manslaughter. The case will be mentioned at West Kowloon Magistrates' Courts tomorrow (June 16) morning. The remaining arrestees are being detained for further enquiries.

Investigation revealed the deceased involved in the affray with the arrestees and was allegedly assaulted by others with hard objects.

Post-mortem examinations will be conducted later to ascertain the cause of death of the deceased.

Active investigation by the District Crime Squad of Sham Shui Po District is underway.

Anyone who witnessed the incident or has any information to offer is urged to contact the investigating officers on 3661 9817.

SITI commences visit to Netherlands (with photos)

The Secretary for Innovation, Technology and Industry, Professor Sun Dong, began his visit to the Netherlands today (June 15, Amsterdam time).

Professor Sun met with the management of an internationally renowned semiconductor company Nexperia to learn about its latest development directions and technology, as well as its businesses in Hong Kong and globally. He also explored with the company on its plan of further expansion in Hong Kong. Nexperia has businesses around the globe with research and development (R&D) facilities established in the Hong Kong Science Park.

Professor Sun visited the showroom of Renault Group in Paris, France and met with the group's management yesterday (June 14, Paris time). BeyonCa, a premium electric vehicle enterprise backed by France's Renault Group and China's Dongfeng Motor Corporation, was established in Hong Kong in 2021 with its international headquarters being set up at the Hong Kong Science Park. Professor Sun was briefed on the latest development and planning of the group and its brands as well as its various innovative businesses. Both sides also explored ways to deepen collaboration.

Professor Sun said, "The Hong Kong Special Administrative Region Government has clearly stated in the Hong Kong Innovation and Technology Development Blueprint that the development of advanced manufacturing and new energy are one of the strategic technology industries, and is actively enhancing support for strategic industries such as new energy vehicles and semiconductor technology, so as to promote new industrialisation in Hong Kong. In promoting microelectronics R&D, the Hong Kong Microelectronics Research and Development Institute was established in September last year to spearhead collaboration among universities, R&D centres and the industry on the R&D of third generation semiconductor core technology. The institute leverages the Greater Bay Area's well-developed manufacturing industry chain and enormous market, and promotes the '1 to N' transformation of R&D outcomes

and industry development. It is preparing the set-up of two pilot lines at the Microelectronics Centre this year, striving to put them into operation next year to support product development and trial production."

During his stay in Paris, Professor Sun was interviewed by local media to introduce the latest situation and opportunities of Hong Kong's I&T, telling the good I&T story of Hong Kong.

Professor Sun will depart for The Hague this evening to continue his visit to the Netherlands.

HAD's emergency hotline stood down

Attention duty announcers, radio and TV stations:

Please broadcast the following as soon as possible and repeat it at suitable intervals:

As Tropical Cyclone Warning Signal No. 3 has been cancelled, the Home Affairs Department's emergency hotline 2572 8427 has ceased to operate.

“ICH Infinity” Fun Day to re-open

As the Tropical Cyclone Warning Signal will be cancelled by the Hong Kong Observatory, the "ICH Infinity" Fun Day to be held at the Hong Kong Intangible Cultural Heritage Centre (at Sam Tung Uk Museum, Tsuen Wan) today (June 15) will be re-opened at 3.40pm.
