

Key statistics on service demand of A&E Departments and occupancy rates in public hospitals

The following is issued on behalf of the Hospital Authority:

During the winter surge, the Hospital Authority is closely monitoring the service demand of Accident and Emergency Departments and the occupancy rates in public hospitals. Key service statistics are being issued daily for public information. Details are in the appended table.

Government gazettes compulsory testing notice

The Government exercised the power under the Prevention and Control of Disease (Compulsory Testing for Certain Persons) Regulation (Cap. 599J) and published in the Gazette a compulsory testing notice, which requires any person who had been present at 13 specified premises during the specified periods (persons subject to compulsory testing) to undergo a COVID-19 nucleic acid test.

Currently, in all districts in Hong Kong, if one or more new confirmed cases are found in the residential buildings (including buildings for both commercial and residential uses), or there are sewage samples tested positive which implied possible infection risks, the buildings will be included in the compulsory testing notice.

For testing targeting at workplaces, if one or more confirmed cases are found in a workplace, it will be included in the compulsory testing notice.

13 buildings fulfilling the above criteria were included in the compulsory testing notice on March 1. Among them, since there were staff of Ward 4S of Tseung Kwan O Hospital, 2 Po Ning Lane, Tseung Kwan O and Dr Wong Chung Yan, Patrick Clinic, G/F, 105A2 Ivy Street, Yau Tsim Mong confirmed positive, persons who had been present at the relevant specified premises have to undergo compulsory testing.

Details of the compulsory testing notice are as follows:

1. Any person who had been present at any specified premises listed in Part A of Annex 1 for more than two hours at any time during the period from February 16 to March 1, 2021 (including but not limited to visitors,

residents and workers), have to undergo testing by March 3, 2021. If persons subject to compulsory testing have previously undergone testing between February 27 and March 1, 2021, they would be taken to have complied with the requirements set out in the compulsory testing notice.

2. Any person who had been engaged to work or had been on duty (including full-time, part-time and relief staff) at any specified premises listed in Part B of Annex 1 at any time during the period from February 16 to March 1, 2021, have to undergo testing by March 3, 2021. If persons subject to compulsory testing have previously undergone testing between February 27 and March 1, 2021, they would be taken to have complied with the requirements set out in the compulsory testing notice.

3. Any person who had been present at the first specified premises listed in Part C of Annex 1 for more than two hours at any time during the period from February 25 to February 28, 2021 (including but not limited to full-time, part-time and relief workers, patients and visitors), have to undergo testing by March 3, 2021. If persons subject to compulsory testing have previously undergone testing between February 27 and March 1, 2021, they would be taken to have complied with the requirements set out in the compulsory testing notice.

4. Any person who had been present at the second specified premises listed in Part C of Annex 1 at any time during the period from February 22 to February 28, 2021 (including but not limited to full-time, part-time and relief workers, patients and visitors), have to undergo testing by March 3, 2021. If persons subject to compulsory testing have previously undergone testing between February 27 and March 1, 2021, they would be taken to have complied with the requirements set out in the compulsory testing notice.

A spokesman for the Food and Health Bureau reminds the public that in accordance with the compulsory testing notice issued earlier, all household members of close contacts are required to undergo compulsory testing. Any person who had lived with a person who is placed under quarantine pursuant to section 22 of the Prevention and Control of Disease Regulation (Cap. 599A) (person under quarantine) in the same residential unit on the date of commencement of quarantine or during the 14 days before that day, and who becomes aware of the quarantine of the person under quarantine when the relevant quarantine has not yet been completed, have to undergo testing within two days of he/she becoming aware of the person under quarantine has been placed under quarantine and report to the Government the result of the test by phone (at 6275 6901), fax (at 2530 5872) or email (ct@csb.gov.hk) within three days of undergoing the test.

The Government will set up mobile specimen collection stations at the following locations today (March 2) for local residents and workers subject to compulsory testing:

- Sau Yat House, Sau Mau Ping Estate, Kwun Tong
- Yeung King House, Lai King Estate, Kwai Chung
- Amphitheatre, Kwai Fong Estate, Kwai Chung

The service period of the mobile specimen collection station at

Butterfly Bay Community Centre in Tuen Mun will be extended to March 5 (Friday), and the station will be open to all members of the public for testing. The opening dates and operating hours of the mobile specimen collection stations in various districts providing free COVID-19 nucleic acid testing services for the general public are stated in Annex 2. Apart from mobile specimen collection stations, persons subject to compulsory testing can also choose to attend any of the community testing centres in all districts to receive testing free of charge.

Persons subject to compulsory testing may choose to undergo testing via the following routes:

1. To visit any of the mobile specimen collection stations (see the list and target groups (if applicable) at www.coronavirus.gov.hk/eng/early-testing.html) for testing;
2. To attend any of the community testing centres (see the list at www.communitytest.gov.hk/en/);
3. To obtain a deep throat saliva specimen collection pack from any of the 121 post offices, vending machines set up at 20 MTR stations or 47 designated general outpatient clinics (GOPCs) of the Hospital Authority and return the specimen to one of the designated specimen collection points (see the distribution points and times, and the specimen collection points and times, at www.coronavirus.gov.hk/eng/early-testing.html);
4. To undergo testing at any of the GOPCs of the Hospital Authority as instructed by a medical professional of the Hospital Authority. Persons subject to compulsory testing in relation to the first specified premises listed in Part C of Annex 1 may undergo testing at any medical facilities of the Hospital Authority as instructed by a medical professional of the Hospital Authority;
5. To self-arrange testing provided by private laboratories which are recognised by the Department of Health (DH) and can issue SMS notifications in respect of test results (see the list at www.coronavirus.gov.hk/pdf/List_of_recognised_laboratories_RTPCR.pdf); or
6. To use a specimen bottle distributed to the relevant specified premises by the Centre for Health Protection (if applicable), and return the specimen bottle with the sample collected as per relevant guidelines.

The spokesman cautioned that, except persons subject to compulsory testing in relation to the first specified premises listed in Part C of Annex 1, testing received at accident and emergency departments of the Hospital Authority or during hospital stays, or testing provided by private laboratories which cannot issue SMS notifications in respect of test results, does not comply with the requirements of the aforementioned compulsory testing notice.

"If persons subject to compulsory testing have symptoms, they should seek medical attention immediately and undergo testing as instructed by a medical professional. They should not attend the mobile specimen collection stations or the community testing centres."

Persons subject to compulsory testing must keep the SMS notification containing result of the test for checking by a law enforcement officer when

the officer requires the persons to provide information about their undergoing the specified test. Persons subject to compulsory testing in relation to the first specified premises listed in Part C of Annex 1 must keep the report containing the result of the test on a mobile device or the SMS notification containing the result of the test for checking by a law enforcement officer when the officer requires the persons to provide information about their undergoing the specified test.

Furthermore, persons subject to testing under the compulsory testing notices should, as far as reasonably practicable, take appropriate personal disease prevention measures including wearing a mask and maintaining hand hygiene, and, unless for the purpose of undergoing the specified test, stay at their place of residence and avoid going out until the test result is ascertained as far as possible.

Any enquiries on compulsory testing arrangements may be addressed to the hotline at 6275 6901, which operates daily from 9am to 6pm. If persons subject to compulsory testing plan to conduct testing at any of the community testing centres, they can check the centre's appointment status in advance. The hotlines of the community testing centres are available at www.communitytest.gov.hk/en/info/.

The Government will continue to trace possibly infected persons who had been to the relevant premises, and seriously verify whether they had complied with the testing notices. Any person who fails to comply with the testing notices commits an offence and may be fined a fixed penalty of \$5,000. The person would also be issued with a compulsory testing order requiring him or her to undergo testing within a specified time frame. Failure to comply with the order is an offence and the offender would be liable to a fine at level 4 (\$25,000) and imprisonment for six months.

Relevant officers of different government departments are empowered to perform certain functions under the relevant Regulations under the Prevention and Control of Disease Ordinance (Cap. 599), including requesting individuals to provide information and assistance when necessary. Any person who fails to comply with the relevant request commits an offence and would be liable to a fine at level 3 (\$10,000). Collection and use of any personal data for conducting COVID-19 tests must meet the requirements under the Personal Data (Privacy) Ordinance (Cap. 486). Government departments or testing service providers which handle the relevant information may provide the data to DH or other relevant departments for anti-epidemic purpose as necessary. The workflow does not involve the provision of any personal data to organisations or persons outside Hong Kong.

The spokesman said, "The Government urges all individuals who are in doubt about their own health conditions, or individuals with infection risks (such as individuals who visited places with epidemic outbreaks or contacted confirmed cases), to undergo testing promptly for early identification of infected persons."

Statistics for COVID-19 Vaccination Programme

Under the COVID-19 Vaccination Programme which started on February 26, a total of about 6 400 persons today (March 1) received their first vaccination doses. Since February 22, a cumulative total of over 27 000 persons have been vaccinated.

As of 8pm today, a total of over 157 000 persons had reserved their first and second doses of a vaccine online today. Since February 23, a cumulative total of over 228 000 persons have made reservations for vaccination.

For the past 24 hours ended at 0000 hours today, there are a total of four cases of ambulance transfer to hospital (details at attachment).

Hong Kong Customs seizes suspected cannabis buds (with photo)

Hong Kong Customs seized about 10 kilograms of suspected cannabis buds with an estimated market value of about \$2 million at Hong Kong International Airport on February 25. One man was subsequently arrested today (March 1).

Through risk assessment, Customs officers selected an air consignment, declared as containing honey, from Canada for inspection. Upon examination, Customs officers found a batch of suspected cannabis buds concealed inside false compartments at the bottom parts of 18 wooden crates carrying a total of 216 bottles of honey.

After follow-up investigation, Customs officers today arrested a 30-year-old man suspected to be in connection with the case in Yuen Long.

Investigation is ongoing.

Customs reminds members of the public to stay alert and not to participate in drug trafficking activities for monetary return. They must not accept hiring or delegation from another party to carry controlled items into and out of Hong Kong. They are also reminded not to carry unknown items for other people.

Under the Dangerous Drugs Ordinance, trafficking in a dangerous drug is

a serious offence. The maximum penalty upon conviction is a fine of \$5 million and life imprisonment.

Under the Ordinance, cannabis and tetrahydro-cannabinol (THC) are classified as dangerous drugs. Importation of products (including food or drinks) containing cannabis or THC into Hong Kong is prohibited unless the relevant provisions in the Ordinance are complied with. In order to avoid breaching the law inadvertently, special attention should be paid to the packaging labels of those products.

Members of the public may report any suspected drug trafficking activities to Customs' 24-hour hotline 2545 6182 or its dedicated crime reporting email account (crimereport@customs.gov.hk).

[Construction site workers can make appointments for free COVID-19 testing service](#)

The Food and Health Bureau announced today (March 1) that the Government will continue to provide one-off free voluntary COVID-19 testing service to all construction site workers in Hong Kong within March. Eligible persons may make booking for testing service online starting today.

ã€€

A spokesman for the Food and Health Bureau said, "The Government started to provide one-off free voluntary COVID-19 testing service to construction site workers at community testing centres through online booking in February. The response had been positive. Having considered the ongoing epidemic situation in Hong Kong, we considered it necessary to expand and extend the relevant testing arrangements.

"The Government will regularly review the coverage of relevant targeted groups based on the latest epidemic risk assessment."

"The free testing service for construction site workers will be available until end March. We encourage eligible persons to actively participate in the free voluntary testing to safeguard their health and that of their families and co-workers. The construction site workers who underwent testing in February can make booking again. Eligible persons can choose a suitable time slot for testing taking into account their own needs. If the eligible persons have symptoms, they should seek medical attention immediately and undergo free testing provided by the Government as instructed by a medical professional. They should not attend the community testing centres."

Eligible persons should make advance booking for the free testing service via the community testing centre booking system (www.communitytest.gov.hk). Those who did not make an appointment have to pay for the testing service at \$240.

The community testing centres are open daily from 8am to 1.30pm and from 2.30pm to 8pm. Deep cleaning and disinfection will be conducted when the testing centres close in the afternoon and at night. When arriving at the community testing centre at the designated time slot, construction site workers should present identity document used at the time of booking (such as Hong Kong identity card or passport), the SMS booking confirmation as well as their construction worker registration card issued by the Construction Industry Council for verification.

The free voluntary testing service will be offered from today (March 1) till March 31. During the period, each eligible person can receive free testing service once only. Participants will be notified by SMS through their mobile phones if the test result is negative. Should any specimen be tested preliminary positive, it will be referred to the Public Health Laboratory Services Branch of the Department of Health (DH) for a confirmatory test. Confirmed cases will be followed up and announced by the Centre for Health Protection of the DH.

In addition to attending the community testing centres for testing, citizens can continue to utilise other free testing channels provided by the Government, including obtaining a deep throat saliva specimen collection pack from post offices, MTR stations or designated general outpatient clinics of the Hospital Authority and return the specimen to the designated specimen collection points. For details on testing means other than community testing centres, please refer to the following webpage: www.coronavirus.gov.hk/eng/early-testing.html.
