

Labour Department occupational health public talks cancelled

In view of the latest local epidemic situation, the Labour Department announced today (January 28) that the following occupational health public talks scheduled to be held at the respective venues have been cancelled to reduce the flow of people and social contact. Enrolled participants will be informed of the cancellations.

February 1: Work & Healthy Lifestyle (Lecture Hall, Hong Kong Space Museum)

February 8: Occupational Health of Office Workers Series (I): Health Hints on the Use of Computer (Lecture Hall, Hong Kong Space Museum)

TD launches website for free-flow tolling service

The Transport Department (TD) today (January 28) launched a website (www.ffts.hk) for the free-flow tolling service (FFTS) to enhance public understanding of the service and toll tags.

The FFTS is a new service that is planned to be rolled out at government tolled tunnels and the Tsing Sha Control Area to bring convenience to motorists. Under the FFTS, motorists can pay tunnel tolls with ease via remote means using toll tags without stopping or queueing up at toll booths. Such arrangements will make driving smoother and help improve the traffic conditions near the tunnels. In addition, the existing toll booths at the toll plazas will be demolished, freeing up space at toll plazas for other traffic-related purposes such as enhancement of existing bus stops.

The new website introduces the details and provides updates of the FFTS. Meanwhile, the TD is carrying out a public engagement exercise, including meetings with different stakeholders and exhibitions to be held shortly. Members of the public are welcome to visit the website and share their views.

Key statistics on service demand of

A&E Departments and occupancy rates in public hospitals

The following is issued on behalf of the Hospital Authority:

During the winter surge, the Hospital Authority is closely monitoring the service demand of Accident and Emergency Departments and the occupancy rates in public hospitals. Key service statistics are being issued daily for public information. Details are in the appended table.

Red fire danger warning

Attention duty announcers, radio and TV stations:

The fire danger situation today (January 28) is red and fire risk is extreme. The countryside is extremely vulnerable to fire. If you are planning to spend the day in the countryside, please take pre-cooked food for a picnic and take all measures to prevent hill fires. The penalty for lighting fires illegally in the countryside is \$25,000 and a year's imprisonment.

Government gazettes compulsory testing notices

The Government has exercised the power under the Prevention and Control of Disease (Compulsory Testing for Certain Persons) Regulation (Cap. 599J) and published in the Gazette compulsory testing notices, which require any person who had been present at 22 specified premises during the specified period (persons subject to compulsory testing) to undergo a COVID-19 nucleic acid test.

Currently in all districts in Hong Kong (except following specified areas and restricted areas), if confirmed cases not epidemiologically linked to each other are found in two or more units in the same building in the past 14 days, the building will be included in the compulsory testing notice. Furthermore, the Government delineates specified areas in accordance with risk assessments. If there is one or more new confirmed cases found in the residential buildings (including buildings for both commercial and residential uses) in the areas, or there are sewage samples tested positive

which implied possible infection risks, the buildings will be included in the compulsory testing notice. The Government will accord priority to the sewage testing of buildings in the areas with confirmed cases in the past 14 days. The buildings will be included in the compulsory testing notice if it is confirmed that the risks remain. Since the infection risk in the community of the specified areas might be higher, the Government encourages residents in the areas to undergo testing proactively and promptly, even if they are not subject to compulsory testing. The mobile specimen collection stations will provide free testing services for all residents in the areas regardless of whether they are subject to compulsory testing or not.

The Government has delineated earlier four specified areas, namely the "Jordan specified area" bounded by Nathan Road to its east, Austin Road to its south, Ferry Street, Man Cheong Street, Man Wui Street and Canton Road to its west, and Kansu Street to its north, the "Yau Ma Tei/Mong Kok specified area" bounded by Nathan Road to its east, Public Square Street to its south, Ferry Street to its west and Dundas Street to its north, the "Hung Hom specified area" bounded by Station Lane to its northeast, Dock Street and Po Loi Street to its southeast, Winslow Street and Hung Hom South Road to its southwest, and Chatham Road North to its northwest and the "Sham Shui Po specified area" bounded by Yen Chow Street to its northwest, Tai Po Road to its northeast, Maple Street to its southeast and Lai Chi Kok Road to its southwest.

Twenty buildings fulfilling the above criteria were included in the compulsory testing notice on January 27. Meanwhile, since there were a number of confirmed cases found in Block C of Tung Fat Building in North Point, the Centre for Health Protection and experts considered after site visit that there was a certain level of infection risks in Blocks A, B and D of Tung Fat Building and the relevant persons should undergo compulsory testing. Furthermore, the Government published on January 15, 2021 a compulsory testing notice on Hiu Fung House of Fung Wah Estate, 6 Fung Ha Road, Chai Wan. In view of the possible long incubation period of the virus, the relevant persons have to undergo a second test.

Details of the compulsory testing notices are as follows:

1. Any person who had been present at any specified premises listed in Annex 1 for more than two hours at any time during the period from January 14 to January 27, 2021 (including but not limited to visitors, residents and workers), have to undergo testing by January 30, 2021. If persons subject to compulsory testing have previously undergone testing between January 25 and January 27, 2021, they would be taken to have complied with the requirements set out in the compulsory testing notice.
2. Any person who had been present at Block A, Block B and Block D of Tung Fat Building, 21-27A, 29-35A and 45-61 Kam Ping Street, North Point for more than two hours at any time during the period from January 14 to January 27, 2021 (including but not limited to visitors, residents and workers), have to undergo testing by January 29, 2021. If persons subject to compulsory testing have previously undergone testing between January 25 and January 27, 2021,

they would be taken to have complied with the requirements set out in the compulsory testing notice.

3. Any person who had been present at Hiu Fung House of Fung Wah Estate, 6 Fung Ha Road, Chai Wan for more than two hours at any time during the period from January 14 to January 27, 2021 (including but not limited to visitors, residents and workers), have to undergo testing during the period from January 27 to January 30, 2021.

The Government will set up mobile specimen collection stations at following places today (January 28) to provide free testing services for local residents and workers:

- Multi-purpose court next to Wah Hei House, Tung Hei Court, Sai Wan Ho
- Open space outside Hiu Fung House and Sau Fung House, Fung Wah Estate, Chai Wan
- Badminton Court for Yee Man House and Choi Man House, Ho Man Tin Estate
- 43 Tung Kun Street (outside T. K. D. S. Fong Shu Chuen School), Yau Ma Tei
- Unloading area of Yau Ma Tei Wholesale Fruit Market (near LPG Filling Station, Hau Cheung Street)
- Tung On Street Rest Garden, 35-41 Tung On Street, Yau Ma Tei
- Open space outside Toa Shue House, Lei Muk Shue Estate, Tsuen Wan
- Hall of Butterfly Bay Community Centre, Butterfly Estate, Tuen Mun

The mobile specimen collection stations at 43 Tung Kun Street in Yau Ma Tei and the unloading area of Yau Ma Tei Wholesale Fruit Market are close to the Yau Ma Tei Wholesale Fruit Market. The Government encourages local residents as well as traders and practitioners of Yau Ma Tei Wholesale Fruit Market to undergo testing promptly and proactively. Yau Tsim Mong District Office has also contacted the Kowloon Fruit and Vegetable Merchants Association and other relevant associations to disseminate the above message to fruit traders and practitioners of the Fruit Market, encouraging them to proactively undergo free testing for health protection of themselves, families and colleagues. Furthermore, the mobile specimen collection vehicles originally located at the section of Canton Road between Jordan Road and Saigon Street (also called Jade Street) will be moved to Man Wui Street (near Ferry Street), Ferry Point, Jordan today (January 28), and will provide service until January 30, 2021 tentatively. The opening dates and operating hours of the mobile specimen collection stations in various districts providing free COVID-19 nucleic acid testing services for the general public are stated in Annex 2. Apart from mobile specimen collection stations, persons subject to compulsory testing can also choose to attend any of the community testing centres in all districts to receive testing free of charge.

Persons subject to compulsory testing may choose to undergo testing via the following routes:

1. To visit any of the mobile specimen collection stations (see the list and target groups (if applicable) at www.coronavirus.gov.hk/eng/early-testing.html) for testing;

2. To attend any of the community testing centres (see the list at www.communitytest.gov.hk/en/);
3. To obtain a deep throat saliva specimen collection pack from any of the 121 post offices, vending machines set up at 20 MTR stations or 47 designated general outpatient clinics (GOPCs) of the Hospital Authority and return the specimen to one of the designated specimen collection points (see the distribution points and times, and the specimen collection points and times, at www.coronavirus.gov.hk/eng/early-testing.html);
4. To undergo testing at any of the GOPCs of the Hospital Authority as instructed by a medical professional of the Hospital Authority;
5. To self-arrange testing provided by private laboratories which are recognised by the Department of Health (DH) and can issue SMS notifications in respect of test results (see the list at www.coronavirus.gov.hk/pdf/List_of_recognised_laboratories_RTPCR.pdf); or
6. To use a specimen bottle distributed to the relevant specified premises by the Centre for Health Protection (if applicable), and return the specimen bottle with the sample collected as per relevant guidelines.

A spokesman for the Food and Health Bureau cautioned that testing received at accident and emergency departments of the Hospital Authority or during hospital stays, or testing provided by private laboratories which cannot issue SMS notifications in respect of test results, does not comply with the requirements of the aforementioned compulsory testing notices.

"If persons subject to compulsory testing have symptoms, they should seek medical attention immediately and undergo testing as instructed by a medical professional. They should not attend the mobile specimen collection stations or the community testing centres."

Persons subject to compulsory testing must keep the SMS notification containing result of the test for checking by a law enforcement officer when the officer requires the persons to provide information about their undergoing the specified test.

Furthermore, persons subject to testing under the compulsory testing notices should, as far as reasonably practicable, take appropriate personal disease prevention measures including wearing a mask and maintaining hand hygiene, and, unless for the purpose of undergoing the specified test, stay at their place of residence and avoid going out until the test result is ascertained as far as possible.

Any enquiries on compulsory testing arrangements may be addressed to the hotline at 6275 6901, which operates daily from 9am to 6pm. If persons subject to compulsory testing plan to conduct testing at any of the community testing centres, they can check the centre's appointment status in advance. The hotlines of the community testing centres are available at www.communitytest.gov.hk/en/info/.

The Government will continue to trace possibly infected persons who had been to the relevant premises, and seriously verify whether they had complied with the testing notices. Any person who fails to comply with the testing notices commits an offence and may be fined a fixed penalty of \$5,000. The

person would also be issued with a compulsory testing order requiring him or her to undergo testing within a specified time frame. Failure to comply with the order is an offence and the offender would be liable to a fine at level 4 (\$25,000) and imprisonment for six months.

Relevant officers of different government departments are empowered to perform certain functions under the relevant Regulations under the Prevention and Control of Disease Ordinance (Cap. 599), including requesting individuals to provide information and assistance when necessary. Any person who fails to comply with the relevant request commits an offence and would be liable to a fine at level 3 (\$10,000). Collection and use of any personal data for conducting COVID-19 tests must meet the requirements under the Personal Data (Privacy) Ordinance (Cap. 486). Government departments or testing service providers which handle the relevant information may provide the data to DH or other relevant departments for anti-epidemic purpose as necessary. The workflow does not involve the provision of any personal data to organisations or persons outside Hong Kong.

The spokesman said, "The Government will continually review the compulsory testing arrangement of the above-mentioned specified areas taking into account the epidemic development, including whether new 'specified areas' will be delineated. The Government urges all individuals who are in doubt about their own health conditions, or individuals with infection risks (such as individuals who visited places with epidemic outbreaks or contacted confirmed cases), to undergo testing promptly for early identification of infected persons."
