

Guidance: Use min-till or no-till farming

Find out how land managers can improve the health of soil by using min-till (minimum tillage) or no-till (no tillage) cultivation.

Guidance: Remove soil compaction

Find out how land managers can improve soil health and crop growth by using machinery and biological processes to reduce soil compaction.

Guidance: Use precision pesticide application systems

Find out how land managers can improve water quality and protect wildlife habitats by applying pesticides more accurately.

Guidance: Manage grazing on improved grassland

Find out how land managers can reduce inputs of fertiliser and manure, improve soil health and benefit wildlife by using pasture efficiently.

Guidance: Use precision application of

fertiliser, manure and other inputs

Find out how land managers can improve business efficiency, and water and air quality, by switching to precision application of fertiliser and manures.
