

Guidance: Use controlled cutting of grasslands to promote wildlife

Find out how land managers can increase plant and animal diversity using the controlled cutting of grasslands.

Guidance: Use rotational grazing on permanent grassland

Find out how land managers can increase the number of plant species and improve soil health on permanent grassland by using rotational grazing.

Guidance: Maintain permanent grassland with very low inputs

Find out how land managers can benefit wildlife, and improve soil and water quality, by managing grassland without artificial fertiliser and pesticides.

Guidance: Harvest seeds or take green hay to restore other grassland sites

Find out how land managers can take green hay and harvest seeds to help create or restore species-rich grassland.

Guidance: Maintain species-rich grassland

Find out how land managers can provide habitat for plants and invertebrates by maintaining species-rich grassland.
