Press release: UK Government Ministers support Wales' rural economy at Royal Welsh Show

For the first time, the UK Government will command a near 20-metre space at the four-day showpiece event in Builth Wells, giving rural industries and members of the public the chance to speak to Ministers and staff about what is important to them and find out more about how the UK Government delivers for people in Wales.

The Secretary of State for Wales Alun Cairns will host a 'women in agriculture' event at the UK Government stand on the showground, to celebrate the pivotal role women play as farmers & food producers in Wales. Businesses will also be able to visit the Department for International Trade (DIT) Export Hub – a 32 tonne, 40ft long lorry with DIT's regional International Trade Advisers on hand to set out the key steps that Welsh companies need to consider if they want to begin their exporting journey.

Secretary of State for Wales Alun Cairns said:

The Royal Welsh Show is Wales' biggest agriculture event and the UK Government will be there in force – taking this excellent opportunity to engage with the industry, underline the importance of the rural economy to Wales and wider UK and show how determined we are to get a good deal for the sector in our EU exit negotiations.

We need to be bold and ambitious and maximise the opportunities Brexit brings. To achieve this it is vital that the UK and the Welsh Governments work together – as well as with businesses – to ensure our rural economy can continue to grow.

Attracting over 240,000 visitors every year, the show also provides an important platform for show-goers to find out how the UK Government is delivering for people in Wales– including on provisions for childcare, pensions, defence and business start-up support. I look forward to meeting businesses and members of the public over the course of the show, to hear about their priorities over the coming months and years.

The Welsh Secretary will be joined at the Show by Environment Secretary Michael Gove on Tuesday where they will host a reception at the UK Government stand to meet industry leaders, businesses and show-goers.

UK Government Environment Secretary Michael Gove said:

The Royal Welsh Show is a real highlight of the summer calendar. From delicious Welsh lamb to Snowdonia Cheese, I am very much looking forward to celebrating the best of Welsh farming, food and rural life.

As we leave the EU there will be more freedom for Wales to support its farmers and enhance its beautiful landscapes. We are working hand-in-hand with the Welsh Government ahead of the Agriculture Bill, so we can deliver a Brexit that works for Welsh farmers and consumers.

UK Government departments attending the Show include:

- The Department for Environment, Food and Rural Affairs (DEFRA) who will be promoting the GREAT campaign: Food is GREAT
- The DVLA who will launch their number plate eyesight campaign with interactive displays at the stand.
- The Department for International Trade (DIT) who will be on hand to provide exporting advice to industry at their export hub truck throughout the week
- The Department for Work and Pensions (DWP) who will provide ‘dream job’ interactive activities for younger and older children and provide advice on the Access to Work scheme
- The Department for International Development (DfID) will bring humanitarian situations that they support all around the world to life with interactive displays of life-saving equipment at the stand.
- The Home Office will be on hand to provide advice on the EU Settlement scheme that will protect the rights of workers in Wales post EU Exit.

UK Government Minister in Wales Stuart Andrew will attend the show on Wednesday. The Chancellor of the Duchy of Lancaster David Lidington MP, the

Leader of the House of Commons, Andrea Leadsom MP and Minister without Portfolio, Brandon Lewis will also visit the Showground over the course of the week.

Visitors to the show are encouraged to visit the UK Government area on Avenue C, LC217 at the showground to find out how Westminster is delivering for Wales.

Press release: Ministers seek views on shale planning reforms

A consultation on proposed planning reforms for exploratory shale gas development in England has been launched by the government today (19 July 2018).

Seeking views on early proposals looking at the principle of whether to designate exploratory drilling for shale gas resources as a new form of permitted development, it would mean that planning consent would not be required.

With the government committed to ensuring that strong safeguards are in place, any new permitted development right would have to abide by both environmental and site protection laws and would not apply to exploratory drilling in sensitive areas (such as Areas of Outstanding Natural Beauty).

Exploratory drilling for shale deposits are treated separately to full hydraulic shale gas extraction, both will remain subject to strict planning and environmental controls.

The 14-week consultation, open until 25 October 2018, will make sure that those with an interest in shale development can have their say and input their views.

The government will then analyse the comments and issue its response later in 2018.

Background

A further consultation on any specific legislative reforms will follow the government's response if these are required.

Government will also consult on whether developers should be required to undertake pre-application community engagement prior to submitting a planning application for shale gas development. This consultation will be launched in autumn 2018.

View the [consultation document](#) on Gov.uk

The consultation follows the publication of a written ministerial statement on the 17 May 2018, in which the government announced a range of measures to facilitate timely decision making on shale exploration planning applications.

[News story: Emergency response prevents huge fish deaths at the River Mole](#)

Since the weekend, fish have been in distress in the River Mole due to environmental impacts caused by the current hot and dry weather conditions.

The Environment Agency has been at the watercourse throughout to take all necessary actions to prevent widespread fish deaths and to use re-oxygenating equipment to boost levels in the river.

Sadly, a significant number of fish, including perch, pike and roach have already died as a result of the naturally occurring incident. Due to the Environment Agency's emergency response it is hoped that now oxygen levels are stable, thousands more fish have now been saved.

Anna Burns, Environment Manager at the Environment Agency, said:

Our officers have worked around the clock to prevent widescale fish deaths at this much-loved river. It is distressing that a large number of fish had perished ahead of our efforts, but our swift emergency response has ensured that many more will now be saved.

We have worked in partnership with Gatwick Airport and Thames Water and we thank them for their valuable assistance regarding this incident. We will all continue to work to prevent further fish deaths and reduce potential harm to local wildlife.

During summer the Environment Agency regularly respond to reports of fish in distress due to natural processes reducing oxygen levels in the water. Hot, sunny weather can lead to low flows in rivers and still water fisheries (ponds and lakes) start to warm up.

Small still waters are particularly susceptible. Rescuing fish is part of the Environment Agency's fisheries management role. Fisheries teams are trained to use aeration equipment or hydrogen peroxide to restore dissolved oxygen levels. When necessary, fish will be rescued and transferred to safety.

Members of the public are encouraged to report any sightings of fish in distress to us via the Environment Agency's 24-hour emergency hotline: 0800 807060.
