

Notice: RM13 9BJ, Veolia ES Landfill Limited: environmental permit application advertisement

The Environment Agency consults the public on certain applications for waste operations, mining waste operations, installations, water discharge and groundwater activities. The arrangements are explained in its [Public Participation Statement](#)

These notices explain:

- what the application is about
- how you can view the application documents
- when you need to comment by

The Environment Agency will decide:

- whether to grant or refuse the application
- what conditions to include in the permit (if granted)

Consultation outcome: Waste Electrical and Electronic Equipment (WEEE) compliance fee 2017

Updated: Added the outcome of the consultation.

We want to know whether you think there should be a Waste Electrical and Electronic Equipment (WEEE) compliance fee set for 2017. We also want to know your thoughts on the two proposals we've received for how the fee should be managed in 2017.

The use of a compliance fee and how it is administered is agreed annually. Companies that don't meet their annual collection targets can comply with the [2013 WEEE Regulations](#) by paying the compliance fee instead.

Notice: NE24 3PB, Port of Blyth: environmental permit issued

The Environment Agency publish permits that they issue under the Industrial Emissions Directive (IED).

This decision includes the permit and decision document for:

- Operator name: Port of Blyth
- Installation name: Battleship Wharf Decommissioning Facility
- Permit number: EPR/RP3337RN/A001

Press release: Waste criminal pays up after Proceeds of Crime confiscation order

A man who ran an illegal waste site for 15 months has been forced to sell his home to pay towards the clean-up of land off the A38 at Eggington near Burton-on-Trent, Staffordshire.

The Environment Agency took confiscation proceedings under the Proceeds of Crime Act 2002 against Robert Murphy, 49, of Carver Road, Burton-on-Trent.

This follows a hearing in May 2015 at Stafford Crown Court when he was sentenced to 7 months imprisonment for operating a site he did not own or have an environmental permit for.

As part of his sentence, a Confiscation Order was made, requiring him to pay compensation of £20,793 to the landowner. The Environment Agency were also awarded prosecution costs of £10,000. Murphy failed to make any payments.

He has since served an additional 12 month default sentence for his failure to comply with the Confiscation Order.

It was necessary for the Environment Agency to enforce compliance with the Order to recover compensation for the landowner who is faced with the costs of site clearance.

This required attendance at further enforcement hearings at Birmingham Magistrates Court. The Confiscation Order and order for costs has now been settled in full.

Between 3 January 2013 and 28 June 2014, Murphy used the land which belonged

to a vulnerable and elderly couple to deposit, store and burn large quantities of mixed waste including metal, wood, electrical items and construction and demolition waste.

An Environment Agency officer involved in the case said:

This has been a long and involved case but it demonstrates that the Environment Agency is determined to tackle waste crime.

We hope this case serves as a message to those involved that we won't stop the fight against this blight, and that it acts as a deterrent against those who undermine legitimate businesses within the industry.

This is a serious issue diverting as much as £1 billion per annum from legitimate business and treasury. Since April 2011 the Environment Agency has invested £65.2 million in tackling it.

We urge any landowners, farmers, members of the public who find these sites to call us immediately on our 24-hour free incident hotline number 0800 80 70 60 or make an anonymous report to Crimestoppers on 0800 555 111.

Press release: Improvements breathe new life into north east park

A partnership project has breathed new life into a local north east park.

The Wear Rivers Trust and Environment Agency have worked together to make improvements to Memorial Park near Stanley.

In the 1950s, Stanley Burn, which flows through South Moor Memorial Park, was diverted into a culvert to make way for a communal paddling pool, which was used for around 15 years and then buried and forgotten.

This new project has now removed the paddling pool and returned the river to its natural channel, creating new high quality habitat for fish and invertebrates while also slowing the flow of the watercourse and increasing flood storage.

Nearby residents of Stanley are also enjoying improved year-round access with a new 300m footpath and two new footbridges. And work is planned in early 2018 to further improve the instream habitat for fish and to naturalise the bankside habitat.

Steve Hudson of Wear Rivers Trust said:

It's great to be involved in a project which offers so many benefits to the local community. By working alongside multiple partners through the Greening the Twizell Partnership, we have managed to improve instream habitat, reduce flood risk and provide new all ability access routes for everyone to enjoy this previously difficult to reach woodland park area.

The project has cost more than £90,000 and is made up of funding from the Environment Agency, Stanley Town Council, Durham County Council and Stanley Area Action Partnership. It's one part of a four-part project in the area which has also included wetland and pond creation and natural flood management measures.

Karen Fisher, Biodiversity Technical Officer with the Environment Agency in the North East, added:

The project has been delivered with Wear Rivers Trust and is an excellent example of partnership working that has delivered multiple benefits.

This includes habitat creation, lengthening the watercourse, new bridges and a seating area, creating a green area for the local community to use.
