

# News story: David Mundell: Celebrating Scotland's LGBT Community

The Secretary of State for Scotland, David Mundell, will tonight [23 February 2017] host leading figures in Scotland's LGBT community at an event to celebrate diversity and tackle prejudice.

The event is being held to mark LGBT history month in Scotland, and comes the day before 'Purple Friday', a day for people across Scotland to show their support for the LGBT community and stand together for equality.

The Scottish Secretary will be joined by representatives from the TIE Campaign, LGBT Youth Scotland, Stonewall Scotland, MSPs and businesses like Barclays, Blackrock, GenAnalytics and Edrington.

The event will also feature a performance by the Edinburgh Gay Men's Chorus and a speech from Commander Duggie Ward MBE, who will talk about his experience of being out in the Royal Navy.

Speaking ahead of the event, Mr Mundell said:

Tonight's event is not only a celebration of Scotland's rich diversity and compassion, but proves that we stand shoulder to shoulder against ignorance, prejudice and bullying.

Young people in Scotland deserve a society where their gender and sexuality has no limitation on their experiences or their aspirations. I am determined to ensure everyone in the Scottish LGBT community is treated with the respect and equality they deserve.

This month we celebrate the history of the LGBT movement, but also its future, building a Scotland which is tolerant, inclusive and diverse.

Commander Duggie Ward MBE Royal Navy said:

From the moment that I came out as a gay man to my family, friends and colleagues in the Royal Navy, I have received nothing but whole-hearted support. "It is this support that has enabled me to develop and grow both personally and professionally as a Naval Officer.

Events like tonight's reception help send out a powerful message that we are all part of a wonderfully diverse society and no matter

what your sexual orientation or gender identity, you are not alone and you can succeed.

## [Greens warn of NHS disaster after EEA doctors say they may leave UK](#)

23 February 2017

The Green Party is urging the Government to reassure EU nationals they are welcome in the UK after a survey revealed 12,000 EEA-trained doctors may leave in light of the Brexit vote [1].

Jonathan Bartley, Green Party co-leader, said:

“The potential for EU nationals to be treated like bargaining chips in Brexit negotiations, is all too apparent in these figures. The Government’s rhetoric and failure to provide assurances have had a clear impact on doctors’ lives.

“The NHS is already under immense pressure and if such a large number of staff leave in such a short space of time it will be a complete disaster. The Government needs to recognise the incredible contributions EU nationals make to our society and give concrete reassurances they can continue the lives they’ve built in the UK.”

## [News story: Civil news: opportunity to deliver housing and debt services](#)

From:

First published:

23 February 2017

We welcome expressions of interest to deliver housing and debt services in North Hertfordshire.

We are inviting expressions of interest from 2013 Standard Civil Contract holders for the delivery of housing and debt services in the North Hertfordshire procurement area.

This opportunity is open to all holders of the 2013 Standard Civil Contract, and is not limited to current housing and debt providers.

You can apply to deliver services in North Hertfordshire by downloading and completing the relevant expression of interest document from our civil tenders' page on GOV.UK – see below.

We are interested in hearing from organisations able to meet the requirements of the 2013 Standard Civil Contract in full.

But we will also consider applications from organisations which feel unable to fully meet the 'permanent presence' or the 'supervisor' requirements.

Organisations interested in delivering any these services must complete and return the relevant expression of interest document(s) by the deadline of 12pm on Thursday 9 March 2017.

## **[Press release: Protection extended for mid Cornwall's wildlife-rich landscape](#)**

Rare butterflies and birds will benefit from a much larger area of protected land in mid Cornwall from today, says Government wildlife adviser Natural England.

The new Mid Cornwall Moors site of special scientific interest (SSSI) merges the six original SSSIs which previously dotted the landscape either side of the A30 and east of Indian Queens, extending their boundaries and protecting

around 50% more of the countryside. The SSSI includes several closely located patches of land, connecting important habitats and helping wildlife to withstand pressures from climate change in the future, creating a stronger refuge and network for rare plants and animals.

The countryside across the Mid Cornwall Moors is a rich and varied mix of heathland, woodland, and wildflower meadows; a vital sanctuary for wildlife, as well as an important asset for local people, visitors, and businesses. Fens and mires in the headwaters of the Fal and Par catchments also help to provide clean water and have the potential to reduce flood risk to homes and properties located further downstream.

Natural England has joined forces with landowners, the Cornwall Wildlife Trust and Butterfly Conservation, building on the successes of the Mid Cornwall Moors LIFE project to create the perfect conditions for the rare marsh fritillary butterfly, which should see its fortune improve as a result. The wet woodlands throughout the area are important for the diminutive willow tit, which has virtually disappeared from large parts of the UK and declined by an estimated 81% since the mid-1990s. The new areas added to the SSSI include important breeding sites for both of these special species.

The former A30 at Goss Moor was downgraded to recreational use for cyclists, horseriders and walkers in 2008. Natural England has been working with Highways England, the Eden Project and Butterfly Conservation to create new habitat areas for butterflies and other wildlife on land alongside the new A30 corridor, several of which have now also been included within the new SSSI boundary. With help from the Eden Project, swathes of devil's-bit scabious flowers – the main food plant for the marsh fritillary butterfly – have been grown and planted alongside the A30.

Speaking at an event at the Eden Project today, Natural England's Chief Executive James Cross said:

The Mid Cornwall Moors are incredibly important areas for wildlife as well as people, and balancing the needs of both are critical to their conservation. Today's notification builds on the success of the LIFE project, providing protection for the much-improved breeding habitats for marsh fritillary butterflies along the A30 corridor – making it a valuable asset, not just for businesses and visitors – but also for wildlife. Mid Cornwall Moors is now one of our top wildlife sites and we are able to give it the protection it deserves.

Seán O'Hea, Mid Cornwall Reserves Manager, Cornwall Wildlife Trust said:

The Mid Cornwall Moors are special because of all of the patches of good quality wildlife habitat scattered across the landscape. This designation is very well thought out because it looks beyond the previous SSSI boundaries to consider what the wildlife really needs to thrive. It extends the protection given by SSSI status to many

more important pieces of land, creating a wider network of protected sites.

Philip Hambly, Chairman of Cornwall Butterfly Conservation said:

The marsh fritillary is threatened, not only in the UK but across Europe. It is therefore essential that this rare butterfly is managed carefully and on a landscape scale so colonies remain connected. Mid Cornwall Moors protection as an SSSI will target conservation to help this butterfly's survival across this very important area. Cornwall Butterfly Conservation's volunteers have already worked in partnership with Natural England carrying out surveys and conservation work and very much look forward to continuing this together.

Dr Caroline Bulman, Head of Species Ecology at Butterfly Conservation, said:

Like many specialist butterflies, the threatened marsh fritillary can only survive when colonies are able to move between areas of suitable wet grassland – which provide the host plant and conditions for them to thrive. We welcome the expansion and changes to the new designation of the Mid Cornwall Moors SSSI, as this will help to protect this and other important species at a landscape-scale and help to reverse the decline, for such rapidly declining species.

The previous SSSIs now included within the Mid Cornwall Moors SSSI include Goss and Tregoss Moors, Red Moor, Retire Common, Breney Common, Tregonetha and Belowda Downs and Belowda Beacon. The area protected as a SSSI has increased by over two square miles and now covers areas totalling six and a half square miles across the wider Mid Cornwall Moors landscape.

The Mid Cornwall Moors SSSI comes into immediate effect from today, 23 February. Landowners, occupiers and interested parties have 4 months in which to make representations or objections to Natural England, who will then decide whether or not to confirm the notification.
