The Environment Agency publish permits that they issue under the Industrial Emissions Directive (IED).

This decision includes the permit and decision document for:

- Operator name: Total Lindsey Oil Refinery Limited
- Installation name: Total Lindsey Oil Refinery
- Permit number: EPR/TP3633NH/V003

News story: Foreign Secretary condemns North Korea ballistic missile launch

The UK firmly condemns North Korea's latest ballistic missile launches. These are in violation of multiple UN Security Council resolutions. We are working with international partners, including in the UN Security Council, of which the UK currently holds the Presidency.

We urge North Korea to stop its provocative actions, which threaten international peace and security. North Korea should instead re-engage with the international community, and take credible, concrete steps to prioritise the well-being of its own people instead of the illegal pursuit of its nuclear and ballistic missile programmes.

Press release: Work begins on £3.8million flood scheme in Totnes

The scheme involves improving existing flood defences along the River Dart from the mainline railway bridge to the Steam Packet Inn. Other measures include providing a new flood wall within Morrisons car park, raising Ashford slipway and providing flood resilience measures to individual properties and flood gates.

Work began on a section of the scheme which didn't need planning permission in January but now South Hams District Council has given the rest of the scheme the green light.

Dan Boswell, for the Environment Agency, said:

This is a fantastic milestone for us and the residents we have been working with to help us shape our designs.

Since the construction of the original defences flood risk has changed and in recent years there have been at least 2 occasions – 2008 and 2014 – where some properties in the town have come close to flooding from the River Dart.

We always ask people to stay flood aware. People can [check their flood risk online](#), by calling Floodline on 0345 988 1188 or by following @EnvAgency and #floodaware on Twitter for the latest flood updates.

Once work is completed on Broadmarsh Industrial Estate, work will move to the areas of New Walk, Throgmorton and the Morrisons car park.

March 2008

Designs for the scheme were drawn up following discussions with landowners and property owners and a public drop-in session in the town in April 2016 and follow-up discussions have been taking place since that time.

The scheme is due to be completed by next winter.

Notes to editors

The project to improve flood defences in Totnes is separate from the planned work at Steamer Quay to repair the existing flood wall. It is hoped that this work will be completed in April 2017.
