

News story: National College for Nuclear opens its doors in Cumbria

The UK's National College for Nuclear was officially opened today in Cumbria.

The UK's National College for Nuclear (NCfN) – a £7.5m two-story college at Lakes College, Lillyhall – will bring a new way of teaching to students while bridging the gap between further education colleges and university, and the workplace.

Sellafield Ltd and EDF Energy are leading industry input into the college which is based at two sites – Lillyhall and Bridgwater & Taunton College, Somerset – helping to ensure its curriculum and qualifications are based on employer need.

The college is one of five government funded national colleges that will deliver high-tech technical training to thousands of learners across England.

Dame Sue Ion officially opened the college in Cumbria, and said:

This new training facility will provide access to world-class technology to individuals looking to start or further develop their career in the nuclear industry.

It is an exciting time for the industry, and it is encouraging to see investments by government, industry and academia into facilities like the NCfN. The nuclear sector is really taking an active role in training the workforce of tomorrow.

The college combines theoretical work with hands-on experience. There are virtual reality rooms to provide students with experience of working in a nuclear environment, an engineering workshop is equipped with the latest technology, laboratories and simulated 'restricted' areas give a detailed view of the work involved at a nuclear plant.

Colin Reed, NCfN Board Chair said:

I'm excited about the opportunities that this brand-new training facility will offer young people at Sellafield, in the supply chain and globally once they've completed their courses.

Sellafield Ltd and EDF Energy will work alongside Lakes College and Bridgwater, plus higher education providers University of Cumbria and University of Bristol, and aim to train 3,500 people by 2020.

Sellafield's mission is changing as we transition into a fully-

fledged environmental restoration project. This will require re-training and reskilling of our staff and a new pipeline of talented individuals with higher level skills across a range of disciplines.

NCfN northern site operations director, Les Agnew said: “The college has taken 12 months to build, and offers a range of qualifications, from post-16 access courses through to degrees. Subjects include robotics, systems and mechanical engineering.

“Lakes College, who will deliver the curriculum, have a new nuclear staff of five who have professional nuclear experience and academic qualifications.

“We have been able to invest in world-class technology thanks to initial investment from government, and sponsorship from companies in the North West. I can’t wait to have a full college of 300 students, some full time and others on block release, meeting the needs of the industries in Cumbria.”

[Press release: Planned Israeli settlement: statement by Minister for Middle East](#)

The UK strongly condemns the Israeli government’s decision to establish a second new settlement deep in the West Bank in less than a year. These plans could involve the retroactive ‘legalisation’ of the outpost of Havat Gilad.

Settlements are illegal under international law and undermine the physical viability of the two-state solution. We call on both parties to refrain from actions which make peace more difficult.

[News story: Donald Kohn and Martin Taylor reappointed to the Financial Policy Committee](#)

Donald Kohn will serve another three-year term on the Financial Policy Committee (FPC), and Martin Taylor a further 12-15 months, the Chancellor of the Exchequer, Philip Hammond announced today (7 February 2018).

Mr Kohn has previously served as the former vice chairman of the Federal Reserve, and Mr Taylor is Vice-Chairman of the Board of RTL Group and former chairman of Syngenta AG. They bring with them a deep expertise on finance, macroeconomics and monetary policy.

The Chancellor of the Exchequer, Philip Hammond said:

Donald Kohn and Martin Taylor have made a wonderful contribution to the Financial Policy Committee during their terms. I'm pleased that Mr Kohn will continue to be on the Committee for a further three years, and that Mr Taylor has agreed to stay on for at least another year.

I am confident that they will continue their good work in helping the Committee to identify emerging risks, taking action, and enhancing the resilience of the UK financial system.

Last year the Chancellor was informed by Mr Taylor that he did not wish to serve a further full three-year term, having already served nearly five years on the Committee and prior to that having been a member of the Independent Commission on Banking. At the request of the Chancellor and the Governor of the Bank of England, Mr Taylor has agreed to stay on the FPC for another 12-15 months. The Chancellor has therefore decided to reappoint Mr Taylor for a full term, but on the understanding that he will step down no later than June 2019.

Later this year, HM Treasury will launch a global search to identify two new external members to join the Committee in 2019. One member will replace Mr Taylor when he steps down, and the other will replace Richard Sharp whose second term expires on 31 March 2019. Mr Sharp is not eligible for a third term.

The Bank of England has also reappointed Alex Brazier, in his role as Executive Director, Financial Stability Strategy and Risk, for a further three-year term as a member of the Financial Policy Committee.

About the Financial Policy Committee

The FPC was established in 2013 and is a vital part of the government's system of financial regulation. The FPC is the UK's macroprudential regulator: its objective is to protect and enhance the stability of the UK's financial system by identifying, monitoring and addressing systemic risks.

The FPC works with the Prudential Regulation Authority (PRA) and the Financial Conduct Authority (FCA) to address risks to the financial system as a whole, while the PRA and FCA have responsibility for microprudential and conduct regulation of individual firms, respectively.

[News story: India's young people heralded for outstanding success](#)

34 young people from nine schools and organisations across India were recognised and presented with a top international honour after receiving their Gold Award from the International Award for Young People, India.

The Awards were presented at the Gold Award Ceremony held at the India International Centre in New Delhi on 7 February 2018, by His Royal Highness The Earl of Wessex, Chair, The Duke of Edinburgh's International Award Foundation.

His Royal Highness The Earl of Wessex said:

It has been a great honour to meet such inspiring young people, hear about their Award journeys and celebrate their achievements.

Achieving your Gold Award is not an easy task – it requires commitment, tests your resilience and challenges you to step outside your comfort zone. But it also opens up many opportunities for young people and enables them to be their own agents of change, both for themselves and their communities.

Kapil Bhalla, National Director of the International Award for Young People, India, said:

The Award helps India's young people to challenge themselves, experience life and find their purpose, passion and place in the world. The Gold Award challenges participants over 18 months and more, in five areas – physical activity, skill development, service to community and by taking them outside of their comfort zone, through an adventurous journey and residential project.

The Duke of Edinburgh's International Award is a global, non-formal education framework which challenges young people to discover their potential and celebrate their achievements. It operates in more than 130 countries and territories around the world, helping to inspire over 1.3 million young people every year.

Further information

The International Award for Young People, India – also known as The Duke of Edinburgh's International Award – is the world's leading youth achievement Award, available to all young people aged 14-24, regardless of their

background, culture, physical ability, skills and interests.

It is delivered around the world by schools, colleges, universities, employers, social clubs, uniformed and non-uniformed youth organisations, young offenders' institutions, religious organisations, sports clubs and other civic organisations.

Founded in 1956 by HRH The Duke of Edinburgh, the Award enables young people to learn, develop and thrive through non-formal education, equipping them for life.

It challenges participants, pushing them to their personal limits and helping them to discover they are capable of so much more than they ever thought possible.

Since its launch over 60 years ago, millions of young people have participated and received Awards, with millions more benefiting from its impact in communities around the world.

In India, the Award was first introduced in 1962 and has since equipped over 100,000 young people and is delivered in more than 260 Award units, schools, universities, community organisations etc.

In 2017 alone, more than 42,000 participants were doing the Award programme in India.

The Award in India also has a strong commitment to work with young people who are considered at risk or marginalised; those with social, physical or economic challenges. The Award aims to ensure at least 20% of all enrolment encompasses young people from these backgrounds.

The International Award for Young People has established key partnerships with NGOs working within the marginalised youth sector, including rural and urban migrants with economic and social challenges and young people with special needs.

The Duke of Edinburgh's [International Award Foundation](#) is a registered charity in England and Wales (1072453). The Foundation's headquarters are in London and it has regional offices in the Americas, Africa, Asia Pacific and EMAS (Europe, Mediterranean and Arab States).

[News story: Update on investigation into Whitstable oyster farm activity](#)

The Marine Management Organisation has provided an update on [the investigation it began in early 2017](#) under the Marine and Coastal Access Act 2009. This related to alleged unlicensed depositing of oyster trestles on a privately owned area of Whitstable Beach by the Whitstable Oyster Fishery Company or its manager Mr Green.

After investigation and careful consideration the MMO has concluded there was insufficient evidence to prove a criminal offence in relation to its remit under the Marine and Coastal Access Act 2009.

The MMO licensing team has also considered the facts and circumstances of the deposit of trestles on Whitstable Beach and has concluded based on an [independent navigational risk assessment commissioned by the Maritime and Coastguard Agency](#) that the array of trestles do not currently constitute an obstruction or danger to navigation. This activity benefits from an exemption relating to shellfish propagation and cultivation under [the Marine Licensing \(Exempted Activities\) Order 2011 as amended \(Article 13\)](#).

The MMO is dealing with the issue [in line with its compliance and enforcement strategy](#) and does not intend to take further, retrospective legal action.

The MMO has a difficult task in managing competing uses of the marine area and appreciates there has been much public debate about the issue. It previously met with a number of local representatives, including the former MP for the area, on the matter. As it is important that the MMO carries out its duties and obligations impartially and fairly it did not feel it appropriate to open this process to a wider audience during an ongoing investigation.

Whilst this investigation has concluded the MMO will continue to monitor the situation and consider issues raised on a case by case basis.
