

[Press release: North East now boasts highest broadband coverage in the UK](#)

New figures out today (29 January 2018) show the Northern Powerhouse is one of the most connected regions in the UK thanks to the government's £1.7 billion broadband roll out programme.

97.2% of the North East is enjoying unprecedented access to superfast broadband – the highest coverage in the country. The North West follows only shortly behind with 96% of the region having access to superfast broadband.

More households and businesses across the North are now accessing superfast broadband speeds of 24 Mbps – more than double the 10 Mbps required by a typical family home.

Today's figures published by [Think Broadband](#) show that the government is succeeding in improving connectivity in the Northern Powerhouse with businesses across the region benefitting from improved digital infrastructure and faster broadband; last year's Autumn budget announced up to £1.8 billion of further government funding for the North to improve transport, digital connectivity, and economic regeneration.

Northern Powerhouse Minister, Jake Berry, said:

The Northern Powerhouse is leading the charge in bridging the rural-urban digital divide. Strong digital infrastructure, including access to superfast broadband, is vital for a flourishing local economy by helping to spur growth and create thousands of new jobs.

We're doing all we can to bring broadband access to even the most remote and rural areas in the country and are giving businesses the tools they need to meet the demands of the digital age.

DCMS Secretary of State, Matt Hancock said:

Over the last 5 years, the government's rollout of superfast broadband has made superfast speeds a reality for more than 4.5 million homes and businesses who would otherwise have missed out. But there's still more to do in our work building a Britain that's fit for the future.

We're reaching thousands more premises every single week, and have committed to making affordable, reliable, high speed broadband a legal right to everyone by 2020.

The government's £1.7 billion rollout of superfast broadband to areas deemed "not commercially viable" by industry has so far reached more than 4.5 million UK premises that would otherwise have been left in the connectivity slow lane, the majority of which are in rural areas.

With 19 out of 20 UK homes and businesses now enjoying superfast broadband access, the government has also delivered on its manifesto pledge to bring superfast broadband to 95% of UK premises.

In addition to the huge benefits to day-to-day life that superfast speeds offer, this closing of the "digital divide" has also delivered a significant boost to local economies – creating around 50,000 new local jobs and generating an additional £8.9 billion in turnover in the areas covered by the government rollout between 2013 and 2016.

The latest broadband coverage figures are available at www.thinkbroadband.com.

Press release: Plans to upgrade the A30 in Cornwall go on public display

Highways England announced the preferred route for the £290 million improvement scheme, part of the Government's £15 billion Road Investment Strategy, in July last year.

The improvement to the eight-mile stretch will help to improve journey times for residents, businesses and visitors, as well as unlocking one of the last bottlenecks in Cornwall.

Since the preferred route was announced, Highways England has been working with landowners along the route to develop the design of the scheme, the details of which will be announced from today (Monday 29 January 2018) when consultation is launched.

Josh Hodder, Project Manager for Highways England, said:

We recognise the strategic importance of improving this section of the A30 in helping to unlock economic growth in Cornwall and the whole of the region.

We look forward to sharing our progressed plans with local stakeholders, businesses and the community, full details are available from today, and we welcome all feedback during consultation.

The scheme offers a number of benefits to the area – as well as

boosting the area's economy, upgrading this stretch of the A30 is vital to improving motorists' journeys, cutting congestion, improving safety and connecting local communities.

After the opening of the Cornwall Council-led A30 Temple to Higher Carblake dualling scheme last summer, Highways England is proposing to upgrade the eight-mile Chiverton to Carland Cross section, which will offer drivers more than 100 miles of dual carriageway between the M5 and Camborne in Cornwall.

The cost of developing the scheme is being partly funded by an £8 million contribution from the European Regional Development Fund, with an additional £12 million for the construction phase. The remainder of the cost of developing and delivering the scheme will be funded by central Government.

Cllr Geoff Brown, Portfolio Holder for Transport at Cornwall Council added:

I welcome this next step and the further consultation with communities. The scheme will help to improve journey times for local people, businesses and visitors and we know from previous public engagement that there is strong support locally to improve this stretch of the A30.

This project will build upon the excellent working relationship that we have with Highways England and I encourage people to take this opportunity to view the proposals and discuss them with the Highways England design team.

Public consultation events will offer people the chance to see detailed plans of the scheme, including junction and slip road access, roundabout and bridge designs, and meet with members of the project team. Information will also be available to view at local information points.

Full details of the scheme and information on the consultation events and information points can be found on the dedicated [consultation webpage](#).

Following consultation, the scheme will then progress through the formal planning process and, subject to statutory approval under the 2008 Planning Act and the Secretary of State, construction is planned to start in spring 2020.

European Regional Development Fund

The project is receiving up to £8 million of funding from the England European Regional Development Fund as part of the European Structural and Investment Funds Growth Programme 2014-2020. The Department for Communities and Local Government (and in London the intermediate body Greater London Authority) is the Managing Authority for European Regional Development Fund. Established by the European Union, the European Regional Development Fund helps local areas stimulate their economic development by investing in projects which will support innovation, businesses, create jobs and local

community regenerations. For more information visit the [European Structural and Investment Funds Growth programme](#) webpage.

[Press release: Local government ethical standards: Committee calls for evidence](#)

The Committee on Standards in Public Life has today [called for evidence](#) about how local councils are supporting good ethical standards in local government in light of changes over the past ten years.

Committee member, [Dr Jane Martin CBE](#) who will be leading on the review, said:

“Robust arrangements to support ethical standards are needed to safeguard local democracy and facilitate the representative process, but also to ensure high standards of conduct by councillors. The Committee considers it is timely to undertake a health check of local government so the public can have confidence that the standards arrangements supporting local democracy are working effectively.

“The Committee has maintained a longstanding interest in local government ethical standards, and regularly receives correspondence from members of the public expressing their concern about this issue.

“We are keen to hear first-hand how effective councils’ standards arrangements are, in light of the substantial changes in the standards landscape for local government over the last ten years.

“We are interested in how local authorities have designed their complaints handling, scrutiny and sanctions regimes in order to maintain excellent ethical standards and how members, local government officials and the public experience them.

“The Committee would like to hear from councils and individuals who can help us understand how ethical standards issues are dealt with by local

authorities.”

Based on the submissions to this review and meetings with key stakeholders, we intend to publish our findings and recommendations late in 2018.

Notes to Editors

1. Interview requests and media enquiries should go to Maggie O’Boyle on 07880 740627.
2. The independent Committee on Standards in Public Life advises the Prime Minister on ethical standards across the whole of public life in the UK. It monitors and reports on issues relating to the standards of conduct of all public office holders.
3. The Committee has an independent Chair. Its membership is comprised of four independent members and a representative from each of the Labour, Conservative, and Liberal Democratic parties.
4. You can follow the Committee on Twitter [@PublicStandards](#)

[News story: Have your say on marine planning in England](#)

The Marine Management Organisation (MMO) is inviting stakeholders to get involved in the next stage of the marine planning process for the North East, North West, South East and South West.

Workshops are running throughout February and March and will provide an ideal opportunity for stakeholders to check progress towards the development of marine plans in their area. The workshops will be supported by an opportunity to respond on-line.

The engagement will focus on:

- Draft marine plan area visions.
- Draft options to address issues in each marine plan area.

For more information on marine plan areas and to subscribe to marine planning follow the links below:

[North West](#)

[South East](#)

[South West](#)

[North East](#)

Consultation workshops are taking place on the following dates and locations:

Area	Location	Venue	Date
North West	Whitehaven	Beacon Portal	07/02/18
North West	Liverpool	Adelphi Hotel	08/02/18
South East	Chatham	Sun Pier House	21/02/18
South East	London	The Wesley Euston	22/02/18
South West	Newquay	The Headland Hotel	06/03/18
South West	Plymouth	Future Inn	07/03/18
South West	Weston-super-Mare	The Winter Gardens	08/03/18
North East	Seahouses	The Hub	20/03/18
North East	Newcastle	Copthorne Hotel	21/03/18
North East	Middlesbrough	Middlesbrough Football Club	22/03/18

You can [sign up](#) for the workshops now.

Further information

- There are 11 English marine plan areas, including inshore and offshore areas. Each area will be covered by a marine plan by 2021 with a 20 year view of activities.
- Marine planning addresses the key issues for the marine area, including the coast, estuaries and tidal waters, as well as developments that impact on these areas. The plans will include a vision and objectives together with policies to achieve them.
- Marine plans are used by public authorities as part of the decision-making process for all new activities and developments in or affecting the marine area.
- Marine plans build on the requirements of the Marine and Coastal Access Act and the Marine Policy Statement.

About marine planning

MMO has produced a short animation called 'What is marine planning?' to explain marine planning.

[Press release: Award-winning Geovation Programme seeks new GeoTech and PropTech disruptors](#)

Location and property data start-ups could be in line to receive funding, business support and the strategic backing of Ordnance Survey (OS) and HM Land Registry (HMLR)

The Geovation Programme is now [accepting applications](#) from start-ups using location and/or land and property data in their products and services. If selected to join the Programme, the start-ups will each receive up to £20,000 in funding and a range of resources and services to help develop their businesses. This includes access to experienced software developers, geospatial expertise from OS, property expertise from HMLR, and mentoring to assist with business proposals and investor relationships.

Geovation has been specially designed to offer the best possible support to small and medium-sized enterprises (SMEs), start-ups and individuals that are using geospatial technology and data to create new products and services. At the start of 2018, Geovation was presented with an international award from the Geospatial World Forum who awarded Geovation its [Geospatial Hub of the Year Award](#). The jury noted that “Geovation has successfully connected individuals and SMEs and created opportunities, envisioned solutions and brought differentiation”.

Geovation members are using location and property data and new technologies to help transform a variety of sectors, including property, mobility and transport, infrastructure, energy, health, and connectivity. Since opening its doors two years ago, Geovation has seen the ventures it has supported raise £12.7 million in investment and created 90 new jobs.

Head of Geovation Alex Wrottesley said:

We offer an exceptional launchpad to PropTech and GeoTech businesses. Programme Members can expect funding, space and data, experienced technical development capacity, and tailored mentorship and support to help develop their business ideas. To be recognised by our international peers with an award for facilitating industry collaboration and adding value to projects critical to the success of the nation’s digital economy was pleasing and unexpected. The recognition is also a compliment to the excellent work of the Geovation team and the support we receive from Ordnance Survey and

HM Land Registry. We're very much future-focused and are looking forward to meeting and working with next group of Programme Members, and being a part of their story and them ours.

John Abbott, Director of Digital, Data and Technology at HM Land Registry, said:

The programme is delivering terrific results, so we are delighted to continue our support for the next tranche of start-ups working on property-related services to make transactions simpler, faster and cheaper for everyone. We expect to see the benefits of this investment across legal, financial and property sectors – stimulating growth for the wider economy and bringing more opportunities to the UK.

Miranda Sharp, Director of Innovation at Ordnance Survey, said:

Combining new technologies and innovative business models to address social and economic challenges lies at the heart of the Government's modern Industrial Strategy. Geovation embodies this. It's an exciting time for Ordnance Survey, and for the geospatial community at large. With the emergence of technologies that have the potential to transform our world and the way we live and do business, I feel we're on the verge of something special. It will be a data-driven world where place is the common factor, which is going to be core to getting value from data connecting, and Geovation is at the heart of this.

For further information, examples of businesses, interviews, and images, contact Keegan Wilson at Ordnance Survey:

About Geovation

[Geovation](#) is an Ordnance Survey Initiative in association with HM Land Registry, which is dedicated to supporting open innovation and collaboration using location and property data. Location is at the heart of many of the most successful digital products and services. Land and property is the foundation of our national economy.

About HM Land Registry

1. HM Land Registry is a government department created in 1862. It operates as an executive agency and a trading fund and its running costs are covered by the fees paid by the users of its services. Its ambition is to become the world's leading land registry for speed, simplicity and an open approach to data.

2. HM Land Registry safeguards land and property ownership worth in excess of £4 trillion, including around £1 trillion of mortgages. The Land Register contains more than 25 million titles, which show evidence of ownership, for some 85% of the land mass in England and Wales.
3. For further information about HM Land Registry visit [our website](#).
4. Follow us on Twitter [@HMLandRegistry](#), our [blog](#), [LinkedIn](#) and [Facebook](#).
