

# Press release: British medical heroes deploying to combat deadly diphtheria outbreak in Bangladesh

NHS staff members of the UK Emergency Medical Team taking part in a training exercise, December 2016

More than 40 British doctors, nurses and firefighters from the UK's Emergency Medical Team (EMT) are making their way to Cox's Bazar, Bangladesh to save thousands of lives at risk from a rapid and deadly outbreak of diphtheria.

This is the first ever deployment of Britain's EMT since it was certified by the World Health Organisation (WHO) in 2016 and will see more than a dozen medical heroes fly out shortly after Christmas on 28 December, followed by the rest in the days after.

The UK's latest response follows a formal request for assistance from the WHO and the Government of Bangladesh after more than 2000 suspected cases and 22 reported deaths from the airborne virus. This is expected to increase significantly over the Christmas period and there are currently not enough staff or beds to manage the outbreak.

Diphtheria is a fast spreading, extremely deadly infection, and there are a reported 160 new cases every day in Cox's Bazar which is home to more than 600,000 Rohingya people who have recently fled the violence and military persecution in Burma. It is especially dangerous for children who are particularly vulnerable. It causes extreme difficulty breathing, inflammation of the heart which can lead to heart failure, problems with the nervous system and fatal paralysis.

People in the UK are routinely vaccinated against diphtheria; however, the overcrowded camps are a breeding ground for this fatal disease. DFID is already providing vaccines in response to the crisis.

The EMT will be deployed to Cox's Bazar for six weeks, where clinicians will work using existing health facilities. This will include 36 NHS medics, such as doctors, nurses and epidemiologists who will provide immediate specialist life-saving care to tackle the diphtheria outbreak, as well as around five logistics staff from UK fire and rescue services who will provide expert advice to create the right infrastructure for the EMT to start their urgent work.

The UK's support will strengthen the capacity of the Government of Bangladesh and NGOs to manage future outbreaks.

An advance team will travel to Cox's Bazar on 27 December to make logistical preparations. Following pre-deployment training, all remaining staff will be deployed from the 28 December, with the first wave leaving from Manchester

Airport.

International Development Secretary Penny Mordaunt said:

This will be an absolutely critical deployment, in a race against time for men, women and children at risk of dying from one of the world's cruellest infections.

Our brave British medical heroes are the world leaders in saving lives, acting rapidly in crisis to avert a humanitarian catastrophe.

I have heard first-hand the harrowing stories of Rohingya families who have escaped persistent persecution, violence and tragedy. In the face of this new horror it is absolutely right that we step up to end their relentless suffering and stop them falling prey to a rampaging, preventable disease that could kill thousands.

Department of Health Minister Steve Brine said:

The UK has a proud tradition of supporting nations in need.

Today marks another proud moment in the history of the NHS as selfless clinical staff once again show their skill, commitment and passion for helping people around the world.

### **Notes for Editors:**

1. The UK's Emergency Medical Team is a collaboration between DFID, the NHS, Public Health England, UK Med – a register of NHS volunteers ready to deploy to emergencies, Handicap International and the UK Fire and Rescue Service. This is the first deployment of the EMT since it was verified by the World Health Organisation (WHO) in December 2016. UK medical personnel have previously been deployed to Typhoon Haiyan in the Philippines in 2013 and the Nepal earthquake in 2015.
2. The deployment will be funded from DFID's Bangladesh humanitarian budget – up to £650,000 has been earmarked for the EMT.
3. Diphtheria is a bacterial infection. It most often causes infection of the upper respiratory tract. Diphtheria is most commonly spread from person to person through respiratory droplets (coughs and sneezes), or by direct contact with either respiratory secretions or infected skin lesions. Respiratory diphtheria usually occurs after an incubation period of 2-5 days. It causes life-threatening airway obstruction (suffocation) if untreated
4. The first suspected case of diphtheria was reported on 10 November at an MSF clinic in Cox's Bazar. The outbreak was confirmed through laboratory testing on 04 December 2017. As of 23/12, 2,248 suspected cases of

diphtheria and 22 deaths have been reported.

5. In response to the diphtheria outbreak in Cox's Bazaar, existing clinical facilities are being converted and scaled up. This is currently being led by Médecins Sans Frontières MSF and the International Organisation for Migration (IOM). However IOM and other international NGOs are unable to manage the complex care needs of these patients, which is why they require the support of UK staff.
6. IOM will provide the medical facilities for the deployment. WHO will provide drugs. UK EMT will provide a specialised clinical team, clinical oversight, some key medical equipment not available in country, and accommodation and transport for staff.
7. Following the request for international assistance by the World Health Organisation on 15 December, a UK EMT team travelled to Bangladesh to conduct an emergency assessment, and recommended the deployment of the EMT.
8. Staff will be rotated out of Cox's Bazaar after three weeks, to ensure they remain fresh. Staff will have a diphtheria booster injection before deployment and will then be at minimal risk of contracting the disease.
9. The International Development Secretary visited Cox's Bazaar in November 2017, where she announced extra UK aid for the humanitarian crisis, providing urgently needed food now and ensuring more lives are not put at risk when international funding starts to run out in February 2018. This brings the UK's total humanitarian support to £59 million since 25 August 2017.

## **[Press release: UK welcomes important prisoner exchange in the conflict in eastern Ukraine](#)**

The prisoner exchange between Ukraine and the Russian-backed separatist is an important development, and is a welcome step towards meeting the commitments all sides have made under the Minsk Agreements.

An FC0 spokesperson said:

The UK welcomes the exchange of over 300 prisoners between Ukraine and the Russian-backed separatists in eastern Ukraine. The release of prisoners is a commitment which Ukraine, Russia and the Russian-backed separatists signed up to as part of the Minsk Agreements to resolve the conflict in eastern Ukraine.

We hope that all sides use this positive development to make progress on their remaining commitments under the Minsk Agreements, beginning with all sides adhering to the ceasefire; engaging cooperatively to reduce the humanitarian suffering of civilians on both sides of the line of contact; and Russia withdrawing its weapons and personnel from eastern Ukraine.

The UK is grateful to all those who mediated this agreement, including the Trilateral Contact Group, the OSCE Special Monitoring Mission and the International Committee of the Red Cross.

## **[Press release: Logging on to festive admin](#)**

While over 7 million people tuned into the Queen's Speech on Christmas day, figures show that thousands of people also logged on to DVLA's online services to stay on top of their admin.

From taxing cars to buying personalised registrations, people chose to log on to DVLA's online services on 25 December 2017.

So, as well as the 10 million turkeys eaten and the thousands of people who took part in a sea swim, on Christmas day this year...

Oliver Morley, Chief Executive of DVLA said:

Giving customers choice in how, where and when they use our services is at the heart of what we do. We are committed to creating digital services that meet the needs of our customers and clearly, these services are allowing people the opportunity to fit their admin into their lifestyle – 365 days a year.

## [Press release: Minister urges households to recycle as much as possible over Christmas](#)

Households across the country are being encouraged by the Minister for Local Government, Marcus Jones, to make it a record-breaking year for recycling over the Christmas period.

It's estimated that the UK recycled a staggering 289,000 tonnes of card packaging last Christmas. However, with the weight of paper and card not collected equating to nearly 2,000 blue whales, there's cause for everyone to double their recycling efforts this year.

From wrapping paper to Christmas cards, mince pie foil cases to Christmas trees, there's a host of items that can be easily recycled or disposed of in a responsible, eco-friendly way.

Local authorities across the UK are offering helpful tips, guidance and even some dedicated treecycling services to help residents recycle as much as they can over the Christmas period:

- Trafford Council has produced the ['naughty or nice'](#) list of items that can and can't be recycled.
- Cambridgeshire County Council has issued [12 top recycling tips](#) to help residents make it a great recycling Christmas!
- The London Borough of Hammersmith and Fulham offer residents a dedicated [Christmas tree collection service on certain days](#) and multiple drop-off

points located across the borough for residents who want to 'treecycle.' The council estimate that it will recycle over 75 tonnes of festive firs over the holiday season.

- Swansea Council has released a downloadable [2018 recycling calendar](#) so that residents can start the year as they mean to go on – recycling as much as possible.
- Lancaster City Council has partnered with St. John's Hospice to boost treecycling and [raise money for charity](#); for a small donation, residents can pay to have their real Christmas trees collected from their doorsteps by hospice volunteers.

Minister for Local Government, Marcus Jones, said:

Local authorities across the country are offering great initiatives to help us recycle as much as we can over the Christmas period – including the Christmas tree!

I'm encouraging households to find out what schemes are running in their area so that they can maximise their recycling and treecycling this year!

Here are DCLG's top 5 recycling tips for the festive season this year:

### **Recycle that cardboard!**

A lot of Christmas gifts will come in recyclable cardboard packing – especially large electronic items such as laptops, televisions and computer game consoles. It's estimated that we could make a cardboard motorway stretching from Leeds to Lapland and back – 111 times – with all the card packaging we use at Christmas. Don't let it go to landfill!

### **Scrunch test your wrapping paper!**

Did you know, paper or cards with glitter can't be recycled? The scrunch test is a helpful way to test whether your Christmas wrapping paper is recyclable.

If you literally scrunch the paper in your hand and it stays in a ball, it can be put into the recycling. Remember to remove ribbons, bows and other adornments before sticking it in the recycling.

### **Don't 'firget' to treecycle!**

Millions of trees brighten up homes and offices across the UK each Christmas. These can be recycled for composting and wood chipping. The chippings can then be used locally in parks or woodland areas.

Some councils will collect Christmas trees with normal garden waste, some will have designated collections and others will have special drop-off points. Visit your local authority's website for detailed guidance. Find out more about the [Forestry Commission's sustainable Christmas trees](#) too.

### **Don't bin the festive fairy lights!**

Fairy lights and other electronic Christmas decorations may be classed as Waste Electrical and Electronic Equipment (WEEE). These items must not be sent to landfill but disposed of at designated sites such as household waste recycling centres. If in doubt, check with your local authority for guidance on disposing of those old fairy lights.

### **You can go 'Cold Turkey'!**

Who doesn't love leftovers? Christmas dinner stays fresh for at least a few days after the big event and for months or more if you put it in the freezer.

You can freeze cooked turkey and use it to make a new meal; if you're sick of turkey and cranberry sandwiches, why not be creative and try making a turkey curry? Additional tips and advice can be found on the [Food Standards Agency's website](#).

## **[Press release: Work underway to refurbish River Nene's Wadenhoe Lock](#)**

Beneath the surface: Wadenhoe Lock was drained to allow essential work to take place, leaving us with this striking and not-often-seen view.

Wadenhoe Lock is getting a complete overhaul, including repairs to the structure, replacement of its mechanism, and a thorough paint job. This will help the lock stay in good, safe working order for decades to come.

The first phase of the work, which took place in November, required the lock to be drained of water, so that the parts usually beneath the surface could be fully inspected and repaired.

The lock is scheduled to close again between 3 January and 12 February for work to continue on the gates, mechanism and paintwork. These dates are subject to change.

### **Sign up for latest updates**

Boaters can get the latest information by [signing up for email updates](#) or calling the Environment Agency on 03708 506 506 and asking for Anglian

Waterways.

Andy Bennison, Anglian Waterways assets senior specialist at the Environment Agency, said:

Our precious waterways are an important part of our nation's rich heritage and beauty. They are a national treasure, valued for their contribution to our environment, our health and wellbeing, and our economy. We're proud to play a part in caring for them, and we take that responsibility very seriously.

Maintaining them to a good, safe working standard is our number-one priority. We invest money very carefully to ensure the best value for every pound we spend. This means our waterways will continue to offer outstanding value to the many, many people who enjoy them every year.

## **Part of £1.4m waterways investment**

The refurbishment to Wadenhoe Lock is part of the Environment Agency's [£1.4m investment into Anglian Waterways](#). The annual Capital Investment Programme sets out the repairs and upgrades being made across the 353-mile navigable network.

Wadenhoe Lock, which bypasses a Grade II-listed watermill with medieval origins, is located in one of the most picturesque areas of the River Nene. Its electrically-operated guillotine gates give access to around 7,000 boaters every year.

The Environment Agency looks after the lock, along with more than [353 miles of navigable waterways](#) in the Anglian region, as well as a vast network of associated facilities such as bridges, locks, moorings and toilets. The agency's work enables thousands of boaters and more than a million other visitors to enjoy these waterways every year.

## **Complete refurbishment**

The work on Wadenhoe Lock includes an engineering inspection of its chamber, replacement of the mitre gate pintle pins, cups and paddle gates, replacement of the vertical shaft and top bevel gears, replacement of the bearings on the horizontal shaft, repairs to the ladders and guillotine gate wheel tracks, an overhaul of the guillotine gate drive gear, and re-painting.
