

News story: Open Call for Innovation cycle 6 deadline extended

As a result, we're extending the deadline for the Open Call for Innovation Cycle 6 from midday today until 7am 30 August 2017.

We're monitoring the situation closely and hope that the service will be back online shortly. We'll keep you updated via our digital channels [LinkedIn](#) and [Twitter](#).

Apologies for any inconvenience.

Press release: Charity Commission review finds sufficient evidence of public benefit in Plymouth Brethren Gospel Hall Trusts

The Charity Commission has today published the findings from its programme of post-registration monitoring of Plymouth Brethren Christian Church (PBCC) Gospel Hall Trusts.

The Commission has not identified any significant regulatory issues relating to the charities' compliance with their governing documents, and has seen sufficient evidence of each charity's engagement with the wider community to demonstrate public benefit.

However, the report sets out a number of areas in which the Commission provided regulatory advice to trustees of the Gospel Hall Trusts, including on the charities' control of charitable collections made at meetings of Gospel Hall congregations.

The regulator committed to monitoring a sample of recently registered PBCC charities to ensure they were complying with their governing documents, including a Deed of Variation (DoV) adopted during the charities' registration with the Commission. Over 100 Gospel Hall Trusts have been registered since 2013; of that number 24 were selected for monitoring, including those about which the regulator was contacted with individual concerns.

As part of its work, the Commission spoke to a number of individuals who were concerned about the treatment of former members at Gospel Hall Trusts. The

Commission accepts that trustees of Gospel Hall Trusts are not responsible for the behaviour of individual members, who have personal choice in their dealings with their own family members and others. However, the Commission's report makes clear that it expects the trustees to ensure the DoV is readily available to members and to have regular discussions with them about its provisions. It concludes that the trustees of these particular charities on the evidence it has seen have acted in accordance with the requirement for compassion set out in the DoV.

Michelle Russell, Director of Investigations, Monitoring and Enforcement at the Charity Commission, says:

This is an important example of our proactive case work focused on recently registered charities. Our aim in monitoring new charities is to ensure they are operating in line with their governing document, and are following any regulatory advice and guidance, to help ensure that the public can support charities with confidence.

In this case, our review is able to provide public reassurance that the trustees of Gospel Hall Trusts are taking steps to embed the principles of the Deed of Variation in the running of their charities; we have provided regulatory guidance to some individual trusts and expect them to follow that advice consistently.

This review follows a report into the first PBCC charity to register, the [Preston Down Trust](#), and concludes the Commission's programme of post registration monitoring of PBCC charities. The regulator says that, as with any charity, it will carefully assess any concerns that may be raised in future.

The [full report is available](#).

Ends

Notes to editors

1. The Charity Commission is the independent regulator of charities in England and Wales. To find out more about our work, see our annual report.

Press release: Introductory Guide to new medical device regulations launched

From sticking plasters to hip replacements, contact lenses to implanted pacemakers, medical devices are a part of everyday life. To make sure these medical devices are acceptably safe and perform as intended, they must comply with the relevant EU legislation.

The Medicines and Healthcare products Regulatory Agency (MHRA) has created an introductory guide to make sure manufacturers are aware of their obligations under the new EU regulations for medical devices (MDR) and in vitro diagnostic devices (IVDR).

Entering into force on 25 May 2017, the three and five year transition periods (also known as implementation) are now underway; the new regulations will apply across EU Member States from 26 May 2020 and 2022 respectively.

The Introductory Guide, designed as an [interactive pdf](#), will help new manufacturers who may be looking at the regulations for the first time, and will also help experienced manufacturers navigate the changes in the new regulations.

The new regulations will include clearer obligations for those involved in manufacturing and supplying devices, a greater emphasis on traceability throughout the whole supply chain with the introduction of a unique device identification (UDI) system and new standards for clinical evidence. They also set out more rigorous vigilance reporting requirements, including new reporting timescales, as well as clearer requirements on what a manufacturer's post-market surveillance system should comprise of. The new regulations are a balancing act of proportionate responsibility and an increasingly technological approach to healthcare.

Some products will become regulated under medical device legislation for the first time. Annex XVI of the MDR lists six categories of products similar to medical devices that do not have any medical benefit and are used for other purposes, such as dermal fillers, non-corrective contact lenses and brain stimulation devices. These products carry much of the same risks as medical devices and – under these new Regulations and detailed 'Common specifications' to be published by the European Commission – their manufacturers, importers and distributors will be regulated in the same way.

John Wilkinson, MHRA's director of Medical Devices said:

We live in an increasingly digital world, and the way we provide our guidance is changing. We want to help manufacturers to comply with the new regulations as easily and as early as possible.

Our guidance is designed for all users – to help experienced manufacturers navigate the increased requirements for devices and diagnostics, as well as those manufacturers who will be new to the medical device regulations as a result of the broader scope of the new legislation.

Patient safety is our priority. It is expected that the implementation of these new regulations will clarify the role of competent authorities increase post-market surveillance to help protect both patients and industry alike.

Press release: HS2 kicks off hunt for London stations construction teams

Work to transform Euston station into a gateway to the capital fit for the 21st Century and deliver a brand new transport hub at Old Oak Common ready for the arrival of High Speed Two (HS2), took a step forward today with the start of the search for the firms that will build the 2 London stations.

The announcement comes after the closure of Euston station over the weekend for essential HS2 preparatory works. The works were completed on time allowing services to run as scheduled on Bank Holiday Monday.

Overall, the investment at Euston and Old Oak Common is expected to help unlock 79,000 jobs and 29,000 homes around the stations, attracting businesses and housing developers to what will be some of the best connected locations anywhere in the UK. Contracts for HS2's Birmingham stations, that are expected to unlock close to 52,000 jobs and almost 6,000 new homes, will follow in 2018, with all the new stations ready to welcome their first passengers in 2026.

HS2 services will eventually connect over 25 destinations and 30 million people across the UK. Trains will serve existing city centre stations in places like Glasgow and Liverpool, as well as brand new purpose built stations in Birmingham, Manchester, Leeds, and the East Midlands.

Transport Minister, Paul Maynard, said:

The launch of the search for construction teams to build the southern HS2 stations is another major step towards making Britain's new railway, a catalyst for growth across the country. And next year HS2 Ltd will begin the hunt for companies to build the 2 Birmingham stations.

The winning bidders will need to ensure that the stations provide the best possible customer experience. But there will also be huge and exciting opportunities for development around all HS2 station sites, not just in London and the West Midlands, but also in Manchester, Leeds, Sheffield, and the East Midlands, unlocking huge opportunities for new jobs, homes and economic growth.

HS2 Ltd Chief Executive, Mark Thurston, said:

Launching this competition is another major milestone for HS2. Over the next decade, the successful bidders will go on to build 2 of the most challenging and high profile elements of the project; a brand new transport hub at Old Oak Common that will kick-start the regeneration of the site plus a major expansion of Euston.

We're looking for the best the construction industry has to offer. Companies that share our commitment to safety, efficiency, environmental protection and value for money. Together we will create 2 iconic stations, gateways to the capital and to the nation that local communities and the travelling public can be proud to call their own.

Working with HS2 Ltd and the Euston and Old Oak Common designers, the successful bidders will act as construction partners, responsible for programme management as well as procuring, integrating and managing the complex supply chains.

It is expected that around 4,000 jobs will be supported during construction of the 2 stations, with around 700 during operation.

At Old Oak Common, HS2 will deliver a brand new integrated transport hub boasting some of the best connections anywhere on the network, with direct HS2 services to destinations including Liverpool, the North West, Glasgow and Edinburgh. New platforms will also allow passengers to connect to Crossrail, for Heathrow and the City of London, as well as services to Wales and the West of England.

The wider transformation of the former railway sidings and light industrial zone is being led by the Mayor of London's Old Oak and Park Royal Development Corporation, which aims to create a thriving new community with up to 65,000 jobs and 25,500 new homes.

At Euston, 11 new platforms, built in 2 phases, will nearly triple capacity, improving people's journeys and providing the opportunity for sustainable mixed use development on the site which could support up to 14,000 new jobs and almost 4,000 new homes.

The staged approach to building the high speed terminus means existing services can continue to operate, reducing both disruption for passengers and the effects on the community as a whole at any one time.

As well as improving journeys for long-distance travellers, HS2 will also open up extra capacity for commuters travelling in from places like Milton Keynes and Northampton and deliver a revamp and expansion of the London Underground station, linking Euston and Euston Square into 1 station for the first time, and providing a new ticket hall and provision for a potential future connection to Crossrail 2.

Bidders for both contracts are expected to be invited to tender by the end of the year, with contract award in autumn 2018. Market engagement has already begun for the Birmingham stations and the procurement process is expected to begin early next year with contract award in 2020. The procurement process for the construction of the Birmingham stations, which have shorter lead-in times, is expected to begin in 2018 with contracts awarded in 2020.

[Press release: July 2017 Price Paid Data](#)

HM Land Registry Price Paid Data tracks land and property sales in England and Wales submitted to us for registration.

This month's Price Paid Data includes details of more than 93,400 residential and commercial land and property sales in England and Wales lodged for registration in July 2017.

Of the 93,474 sales lodged for registration:

- 69,692 were freehold
- 8,269 were newly built
- 28,244 sales took place in July 2017
- 569 were residential sales in July 2017 in England and Wales for £1 million and over
- 329 were residential sales in July 2017 in London for £1 million and over

Property type	July 2017
Detached	21,204

Property type July 2017

Semi-detached	24,117
Terraced	24,952
Flat/maisonette	16,682
Other	6,519
Total	93, 474

The most expensive residential sale in July 2017 was of a terraced property in the London Borough of Kensington and Chelsea for £9,360,000. The cheapest residential sale in July 2017 was of a terraced property in Bishop Auckland, County Durham for £18,750.

The most expensive commercial sale in July 2017 was in the City of Westminster, London for £215,399,999. The cheapest commercial sale in July 2017 was in Newcastle upon Tyne for £200.

Notes to editors

1. Price Paid Data (PPD) is published at 11am on the 20th working day of each month. The next dataset will be published on 28 September 2017.
2. [Price Paid Data](#) is property price data for all residential and commercial property sales in England and Wales that are lodged with HM Land Registry for registration in that month, [subject to exclusions](#).
3. The following information is available for each property:
 - the full address
 - the price paid
 - the date of transfer
 - the property type
 - whether it is new build or not
 - whether it is freehold or leasehold
4. Price Paid Data can be downloaded in txt, csv format and in a machine readable format as [linked data](#) and is released under [Open Government Licence \(OGL\)](#). Under the OGL, HM Land Registry permits use of Price Paid Data for commercial or non-commercial purposes. However, the OGL does not cover the use of [third party rights](#), which HMLR is not authorised to license.
5. Price Paid Data includes Standard Price Paid Data (SPPD) for single residential property sales at full market value and Additional Price Paid Data (APPD) for transactions previously excluded from SPPD such as:
 - transfers to a non-private individual, for example a company, corporate body or business
 - transfers under a power of sale (repossessions)
 - buy-to-lets (where they can be identified by a mortgage). The information available for each property will indicate whether it is

APPD or SPPD and the record's status – addition/change/deletion (A/C/D).

6. The [Price Paid Data report builder](#) allows users to build bespoke reports using the data. Reports can be based on location, estate type, price paid or property type over a defined period of time.
7. As a government department established in 1862, executive agency and trading fund responsible to the Secretary of State for Business, Energy and Industrial Strategy, HM Land Registry keeps and maintains the Land Register for England and Wales. The Land Register has been open to public inspection since 1990.
8. With the largest transactional database of its kind detailing over 24 million titles, HM Land Registry underpins the economy by safeguarding ownership of many billions of pounds worth of property.
9. For further information about HM Land Registry visit www.gov.uk/land-registry.
