

welters Burial Chambers

welters organisation introduced the concept of single cast burial chambers, mausolea cells and memorial housings to the industry over 30 years ago and the company continues to design, manufacture, supply and install these facilities nationwide. By operating its own manufacturing facility, the company avoids using third party concrete producers or subcontractors, resulting in an unrivalled standard of production quality and consistency.

welters complete another successful year

2017 concluded another successful year for the company. With full order books, they are ever confident that 2018 will provide more opportunities for new product developments and innovative contributions to the market. As the success of the company grows, this also provides an opportunity to bring new staff on board at both the production facility and also for onsite works, creating new jobs and expanding their skilled workforce to cover the increase in productivity and output.

For over thirty years, the company has striven to ensure that it has the ability to design, manufacture, supply and install their entire OPC and decorative stone components at its own manufacturing facility, negating the need to use third party concrete producers or installation contractors. This means that the design, production and delivery of all projects is maintained and administered from within the company, giving WOW a strong foundation for a reliable and lasting service provision to its clients.

Unrivalled Service Delivery

An example of welters' mausolea, sarcophagi and burial chambers

welters organisation introduced the concept of single cast burial chambers, mausolea cells and memorial housings to the industry over 30 years ago and the company continues to design, manufacture, supply and install these facilities nationwide. By operating its own manufacturing facility, the company avoids using third party concrete producers or subcontractors and it also employs dedicated site installation teams to ensure unrivalled service delivery. **welters®** are presently installing new community mausolea, sarcophagi and burial chambers for a large Midlands based Authority. The installation forms part of a long standing provision of interment facilities carried out over many years, serving both Christian and Muslim communities.

As part of their design and innovation ethos, **welters®** are currently developing a new baby and infant niche memorial product, designed to reduce the need for 'shrine building' that so commonly afflicts many children's interment areas. It is a sensitive issue that so often descends into conflict between the Burial Authority and bereaved parents and this new product is designed to help meet the needs of both parties.
