

News story: New agreement strengthens UK-Saudi Arabia Defence relationship

The governments of the United Kingdom and the Kingdom of Saudi Arabia have announced a new Military and Security Cooperation Agreement, signed today in Jeddah by the Defence Secretary Sir Michael Fallon and the Saudi Crown Prince HRH Mohammed bin Salman.

Defence Secretary, Sir Michael Fallon said:

The security of the GCC, of all Gulf Countries, is critical to UK security. I am delighted to have signed today with HRH the Crown Prince of Saudi Arabia a new Military and Security Cooperation Agreement between our two countries; this Agreement further cements the UK's long standing relationship with our key Gulf partner.

The agreement will promote cooperation between our two countries across the Defence and Security sectors, helping Saudi Arabia better protect her national security, including counter-terrorism, intelligence, training and education, medical services and logistics.

The agreement was signed during a wider visit to the Middle East, in which the Defence Secretary met British personnel serving in Iraq. He also visited the Combined Air Operations Centre (CAOC) at Al Udeid Air Base in Qatar, where the UK is working closely with US as the two largest contributors to the Coalition's military campaign.

During his time in Iraq, Sir Michael met with personnel from the Mercian Regiment, Engineer Regiment, Intelligence Corps, and Medical Regiments at Erbil and Taji where they have been involved in training Iraqi Security Forces, Kurdish Forces and Ninewah police.

Press release: Update on Government response to Hurricane Irma and Maria

We remain concerned that Hurricane Maria, which is strengthening as it approaches the Leeward Islands, could hit the UK's Overseas Territories in the Caribbean already affected as well as Montserrat.

FCO, DFID and military teams are working closely with the Governors in the Overseas Territories to ensure we are doing all we can to support the

Governments of the islands affected.

Ministers discussed the preparations that have been put in place:

- Over 1300 military troops are staying put in the region – either on the islands already affected or in locations from where they will be able to readily deploy once Maria has passed.
- An additional 42 strong military resilience team has been deployed forward to British Virgin Islands prior to Hurricane Maria ready to support additional needs there.
- A military reconnaissance team has been put on standby to go to Montserrat to assess need if it is hit by Hurricane Maria.
- DFID has established logistics hubs in the Dominican Republic, Barbados and Antigua & Barbuda to ensure swift supply of relief items if required and is procuring additional supplies from Miami and Panama.
- HMs Ocean, which is due to arrive in the region at the end of the week, with 60 tonnes of DFID supplies on board will be deployed according to need once Hurricane Maria has passed.
- On the basis of the latest weather forecast, we are advising against all but essential travel to Montserrat and Anguilla and against all travel to the British Virgin Islands.
- All those in the region are urged to follow the advice of the local authorities.

To date, the UK government has allocated £57 million to the immediate response effort and agreed to match up to £3 million of public donations to the Red Cross appeal.

75 tonnes of DFID relief items have either arrived or been procured in the region including much needed food, water, nearly 3,000 shelter kits, 5,000 hygiene kits and 10,000 buckets.

40 tonnes of humanitarian aid has been distributed including over 4 tonnes of food and water on the British Virgin Islands; 720 litres of water to the Turks and Caicos Islands; and over 2 tonnes of building materials to Anguilla.

[News story: COBR meeting, 18 September 2017: Sir Alan Duncan's statement on](#)

Hurricanes Irma and Maria

Minister for the Americas Sir Alan Duncan said:

I'm back in the Crisis Centre because once again we've had another meeting of COBR, which is our emergency committee, because we're looking at an unprecedented sequence of events where having had so many hurricanes there's now a serious danger that we're going to get yet another.

So we are tracking Hurricane Maria and as you can see behind me we've got all the details to see where it's going, and we have to prepare for the worst but hope for the best. But one of the consequences of having these earlier hurricanes is we've got a lot of people and equipment in place.

So what we are very vigorously doing now is trying to anticipate where the damage might lie, and pre-positioning supplies and all of the equipment that can lead to the maximum resilience for these poor people who've been hit once and might be hit again.

So we are focusing of course on our Overseas Territories, which on this occasion might include Montserrat, which was lightly affected last time, but we are working around the clock to do our very best. And I'd urge everybody to follow the [travel advice](#) which we are regularly updating.

Be assured that we are doing our utmost to anticipate where help is needed and to make sure that if this hurricane hits people, and hits them again, we will be there to deliver the need that people will want.

Press release: UK ready to respond to Hurricane Maria

VIDEOS AND IMAGES – [view and download from Google drive](#)

The UK is in position to respond to further extreme weather in the Caribbean

as the approaching Storm Maria is reclassified as a hurricane. The hurricane comes less than two weeks after Hurricane Irma, the most powerful hurricane ever recorded.

UK experts on the ground are working closely with national authorities to prepare for the approaching hurricane. Staff, military assets and relief supplies remain in the region and are ready to respond.

DFID, alongside other government departments, are already working on plans to deal with the hurricane's aftermath and are in close contact with Governor's offices. This includes efforts to get people to public shelters and secure loose materials and debris which could cause further injuries.

International Development Secretary Priti Patel said:

We are under no illusions about the possible impact of Hurricane Maria and are taking every measure possible to prepare communities which have already been devastated by Hurricane Irma.

British troops, police and aid experts are working relentlessly to get help to the victims of Hurricane Irma. Those same individuals will now be tasked with also preparing for the impact of Maria, and to ensure support continues to get to those in need.

Chris Austin, the Head of the UK's Joint Task force, added:

We are planning for the unexpected, we are planning for the worst. We need to demonstrate our own resilience because there is a real chance that Hurricane Maria may significantly impact on our existing efforts to provide relief.

To date, 75 tonnes of DFID relief items have either arrived or been procured in the region including much needed food, water, nearly 3000 shelter kits, 5,000 hygiene kits and 10,000 buckets.

A further 60 tonnes of aid and reconstruction materials is on the way to the region on HMS Ocean, and DFID has chartered a number of flights and vessels which will transport additional relief items to the affected islands.

The UK is also leading the way in the long-term reconstruction of islands hit by Hurricane Irma. Speaking at the 72nd session of the United Nations along with Foreign Secretary Boris Johnson, Ms Patel will say that whilst relief effort will go on, plans are being put in place to help rebuild on the islands, more resiliently than in the past, so a future hurricane won't be as devastating.

UK aid is already having a significant impact on many of the victims including Dorothy, a victim of Hurricane Irma in the British Virgin Islands, who said:

I was so happy when the soldier told me yesterday that my house was the first house that was fixed. He said that they had given people things to fix their houses but my house was the first house that a soldier came and fixed. I said God I'm blessed.

I was the happiest person on earth because I was very sad because I had lost everything. With whatever people give me, or what I can get myself, I'll fix up my place so it looks like somewhere I can live.

Notes to Editors

- Maria is currently a Category 1 hurricane with sustained winds of 80mph. The hurricane is expected to strengthen as it heads towards the Leeward Islands (Barbados). Hurricane warnings are in place for Antigua, Barbuda, Montserrat and Anguilla.
- 32 aid experts, 1,300 military personnel and 59 police officers are working on the UK's response.
- So far the UK has committed nearly £60 million as part of its response to Hurricane Irma.

[News story: Ministers announce Ajax delivery milestone in Wales](#)

The ministers viewed a demonstration of the new Ares protected mobility vehicle, part of the £4.5 billion Ajax family of armoured vehicles, at the factory in Merthyr Tydfil. The platforms will now continue going through a process known as Government Acceptance Training (GAT) before they are handed

over to the Army.

Minister for Defence Procurement, Harriett Baldwin, said:

I am delighted to see the Ares in action. This vehicle, and the others in the Ajax family, will give the British Army a multi-role, mounted fighting power and reconnaissance capability fit for the future. We continue to invest in the best equipment for our Armed Forces, and I'm delighted to support such strong investment in Wales

The ministers were also given a tour of the facility which was only opened in 2016, bringing around 250 jobs to the area. The MOD is the biggest provider of apprenticeships in the UK and many of those the ministers met were manufacturing and mechanical apprentices, keen to talk about their work in the factory. The Ajax build programme is also sustaining 300 jobs at General Dynamics' nearby Oakdale site.

Defence Minister Harriett Baldwin met with apprentices working on the Ajax programme at the factory in Merthyr Tydfil.

Backed by a rising defence budget, last year the MOD spent £870 million with Welsh businesses, helping to build a stronger economy and keep Britain safe, with Ajax representing the biggest single order for a UK armoured vehicle in 30 years. MOD investment in Wales works out to £280 per capita.

Minister for the UK Government in Wales Guto Bebb, said:

The UK Government is delivering on its ambitions for economic growth in Wales and is helping to improve people's lives. Here in Merthyr Tyfil, General Dynamics are building next generation vehicles for the Army, providing jobs and skills that drive a stronger economy for Wales and for the UK.

The six variants in the Ajax programme – Athena, Ajax, Ares, Apollo, Atlas and Argus – are due to come into service in 2020, providing a full suite of medium armoured vehicles and capabilities. The 'GAT' process for the Ares platforms is now being undertaken by the Army, conducting acceptance for both the British Army and Defence Equipment & Support (DE&S) at the facility in Merthyr Tydfil.

The range of Ajax variants will form a key component in the Army's modernised warfighting Division conducting full-spectrum and network-enabled operations. They will operate in combined-arms and multinational situations across a wide-range of future operating environments.

The news comes after several other milestones revealed at the Defence and Security Equipment International (DSEI) exhibition last week. These included:

- The start of manned live firing trials for Ajax, including trials of the CT40 cannon, chain gun and smoke grenade launchers.
- The award of a subcontract to Raytheon UK for power switching systems.
- The first appearance at DSEI of digital training systems being delivered by subcontractor Lockheed Martin, including small arms handling and turret crew trainers.
