

# China encourages college grads to work in grassroots

The central government has issued a guideline to encourage more college graduates to work at the community level.

The guideline, which was jointly issued by the General Office of the Communist Party of China (CPC) Central Committee, and the General Office of the State Council, has been designed to involve college graduates in economic and social development.

College graduates will be encouraged to find employment in the modern seed industry, agrotechny, countryside tourism, rural e-commerce, rural cooperatives and water conservation projects, according to the guideline.

The guideline says college graduates will be encouraged to work in the middle and western parts of the country, the northeast China and other less-developed and remote areas.

Graduates will also be encouraged to join the army with preferential policies.

The guideline says college graduates will be encouraged to work for small- and medium-sized enterprises, or start their own businesses.

To be attractive to graduates, companies must offer good training programs as well as higher wages and allowances, according to the guideline.

The guideline stipulates that civil servant recruitment in provincial-level agencies will only consider candidates with at least two years of grassroots working experience.

The government estimates that about 7.95 million college students will graduate this year, accounting for over a half of newly-added urban labor force.

## Ruth reacts to Article 50 decision

24 Jan 2017

Scottish Conservative leader Ruth Davidson has given her reaction to the Supreme Court decision that parliament must vote to trigger the UK's departure from the EU.

She said the SNP has been using the case "to hold the UK to ransom", and the party must now state if it wants Britain's negotiations to succeed or fail.

**Scottish Conservative leader Ruth Davidson said:**

"The SNP tried to use this hearing to hold the rest of the UK to ransom. It has comprehensively failed to do so.

"All parties should now respect the ruling that the court has given.

"Yet typically, Nicola Sturgeon has decided to ignore it by stating – even before the verdict was in – that she would still seek a separate vote at Holyrood.

"The Scottish Conservatives will have no truck with yet more SNP stunts on Brexit.

"Whatever side people were on last year, Scotland wants to get on with the negotiations so we can start to leave the uncertainty of the last few years behind us.

"We have all had enough of the nationalists using every diversionary tactic they can to try to use Brexit to manufacture a case for separation.

"The SNP needs to decide: does it want Britain's renegotiation to succeed or fail?

"If it is the former, it needs to end the attempts to sow division and add to the uncertainty we face, and instead get behind the UK attempt to get the right deal for the whole UK."

# Press release: Integrating the Science and Technology Support for the UK's Defence and Security

From:

First published:

24 January 2017

An integration has been agreed between the MOD's Defence Science and Technology Laboratory (Dstl) and the Home Office's Centre for Applied Science and Technology (CAST).

An integration has been agreed between the Ministry of Defence's (MOD) Defence Science and Technology Laboratory (Dstl) and the Home Office's Centre for Applied Science and Technology (CAST). This has been decided following a review to examine the best way to provide enduring and appropriate science and technology (S&T) support to the Home Office and the MOD. The integration will improve the resilience of the S&T support that makes such a major contribution to the nation's defence, policing, security and resilience.

Commenting on today's announcement, Dstl's Chief Executive, Jonathan Lyle said:

Combining our capabilities will improve the science and technology support for the MOD and Home Office, and enhance the nation's defence and security. Dstl and CAST already work closely together on key projects such as forensics, body armour and detection systems. We intend to continue to build on this existing close relationship to make the integration process a success.

The Head of CAST, Andy Bell, added:

This development will enable a more joined-up, coherent approach to science and technology provision for security, policing and resilience in the UK. The move will mean that our customers have access to a wider range of scientific and engineering expertise across government, industry and academia, giving broader access to innovative ideas and solutions. There is a lot of hard work to be undertaken before we complete the move, and we will be providing full support to our staff throughout the transition.

The integration is expected to start in 2017 and end by 2020. CAST's staff and work will move to become part of Dstl, and be primarily based at Porton Down, near Salisbury. An integration programme team will work jointly across Dstl and CAST to support the transfer of staff and capabilities during the transition period, ensuring continuity in support of national security, defence and policy.
